Expanded Memory

plus Parallel/Serial/Game Ports & Clock Calendar

FASTCARD® with 640K RAM

LOTUS EMS COMPATIBLE

FOR IBM PC, XT, OR COMPATIBLE

- Automatically uses RAM on board to fill system memory to 640K, and provide Expanded Memory above the 640K limit.
- Disk caching & print buffering software included.
- Complete diagnostic routines.
- Hardware-based custom password security allows you to protect sensitive data.
- Built-in parallel printer port, 9-pin serial port, and game port interface on board.
- Built-in real time clock calendar.

"One of the best I have used! Performs flawlessly. The software/hardware combination is far superior to the Intel and AST EMS boards, and the installation was immeasurably easier."

K.B., Lombard, IL

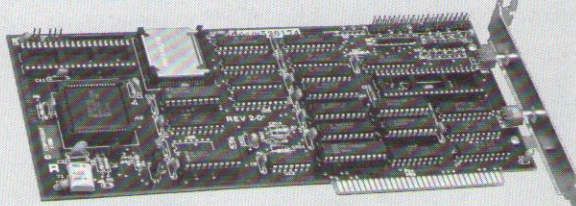

"Excellent installation procedures! The board also works very well in a large number of different systems. We could use a lot more products like this in the industry."

D.W., Honeywell Information Systems

80286 Coprocessing Upgrade

Convert your PC, XT, or Compatible to 286 Power & Performance

FAST286

100% COMPATIBLE WITH ALL EXISTING IBM PC/XT SOFTWARE.

- 8 MHz Operation
- Bus Independent Operation
- Switch selectable mode between 8088 & 80286 guarantees 100% software compatibility.
- 8 KB of Zero-Wait-State memory.
- Compatible with all 8 MHz Motherboards.
- IMS Disk Caching Software included.

FAST286 is the low cost alternative to the high cost of replacing your current PC, XT or Compatible.

ONLY

\$249

"It's great! On a cost performance evaluation, yours is the best. Your technical support is about the best I've seen."

M.W., Sterling, IL

"Works fantastic! Can't believe how it improves and speeds up Lotus!"

N.T., Chicago, IL

"My XT acts like an AT. I am amazed!"

D.G., Westinghouse
