

# DATA ACQUISITION AND INSTRUMENTATION & CONTROL PRODUCTS FOR IBM AND COMPATIBLE PERSONAL COMPUTERS

## PC BOARD LEVEL INSTRUMENTATION

The new PCIP family of products can turn your PC into a 4 1/2 Digit Digital Multimeter, Digital Logic Analyzer, Voltage Calibrator, or Function Generator. Each instrument comes complete with software for easy operation. Your computer keyboard or a "mouse" activates up to three simultaneous screen displays on your PC, by using a pop-up/pop-down system similar to Sidekick or PCTOOLS.

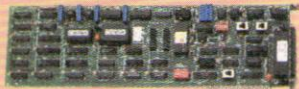

## MICRO-CHANNEL DATA ACQUISITION INTERFACES

MetraByte supports IBM PS/2, Models 50 through 80 and Micro-Channel compatible computers with a complete family of products. The uCDAS-8PGA is an 8-channel Analog Input Board with Software selectable input ranges. Also featured in this family are the uCDDA-04, a 4-channel analog output board with a 24 bit digital I/O, the uCTM-05, a 5-channel counter, and communication boards for IEEE-488/GPIB and RS-422.

## IBM PC/XT/AT, PS/2 DATA ACQUISITION INTERFACES

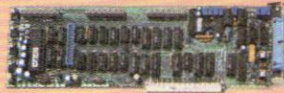

MetraByte offers the widest selection of Data Acquisition & Control boards and accessories for the IBM PC/XT/AT and PS/2 Models 25/30. The newest addition is the DAS-50, a 1 MHz High Speed A/D interface with on-board memory. Other products in this family include; the DAS-16, 16F and 16G high speed boards, the DAS-8 and DAS-8PGA medium speed boards, and the DAS-20, a high performance board.

For Data Acquisition & Control, no one offers a wider choice of plug-in interface boards for the IBM PC/XT/AT, PS/2, Micro-Channel, Apple II, Macintosh, and VME bus computers and compatibles than MetraByte.

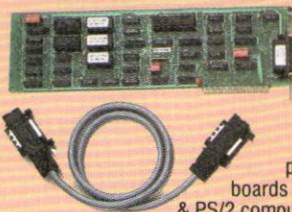

MetraByte provides cost effective products to meet your Data Acquisition & Control needs. Whether you're in a laboratory setting or in an industrial environment, MetraByte offers high quality products and an unsurpassed level of technical support for your application.

For all your Data Acquisition & Control needs, look to MetraByte, "The Leader In Data Acquisition & Control For Personal Computers."

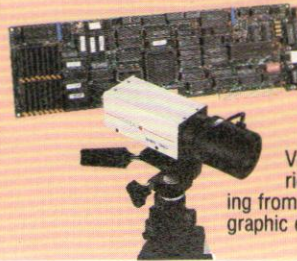

## MACINTOSH DATA ACQUISITION PRODUCTS

Data Acquisition and Control is made easy with the new MBC-625 series. This high performance, flexible, Data Acquisition System is designed for the Macintosh II and SE computers, based on the MBC-625 Nubus compatible multifunction mother board. Seven daughter boards provide high speed sampling, multiplexing, plus digital and analog I/O capability.

## COMMUNICATION INTERFACES

MetraByte offers a complete family of plug-in communication boards for the IBM PC/XT/AT & PS/2 computers and compatibles. The MetraByte family of products includes; GPIB/IEEE-488, RS-232, RS-422 and RS-485 interface boards. Each board provides maximum user flexibility, while maintaining ease of use.

## FRAME GRABBER/IMAGE PROCESSING

The new MV Series of vision products for the IBM PC/XT/AT, makes high performance imaging both practical and affordable. The MV Series is designed for application in Automated Inspection, Medical Diagnostics and Research, Machine Vision, Graphic Arts and Security/Surveillance systems. The MV Series is supported by an easy-to-use library of software products ranging from simple photographic acquisition to sophisticated manipulation and graphic enhancement.

Send Today for your FREE 256 page MetraByte Data Acquisition and Control Interface Handbook and/or your FREE Acculex Handbook of Digital Panel Meters and Printers.

**HANDBOOK REQUEST CARD**

440 Myles Standish Blvd., Taunton, MA 02780 (508) 880-3000

or call us at (508) 880-3000

Please send my Free Handbook on Data Acquisition and Control. I am interested in learning more about:

- Plug-In Interfaces for IBM/PC/XT/AT's & PS/2 computers.
- Industrial Control Interfaces for IBM PC/XT/AT and VME Bus Computers
- Frame Grabber/Image Processing
- PC Based Test Instruments
- Acculex Digital Panel Meters & Printers

My need is immediate, please have a Sales Engineer call me.

## New 256 Page Data Acquisition and Control Handbook

*MetraByte solves your Data Acquisition and Control needs 10 ways!*

- Plug-In Interfaces for IBM PC/XT/AT and compatible computers
- Plug-In Interfaces for IBM PS/2 and Micro-Channel compatibles
- Plug-In Communication Interfaces: IEEE-488, RS-232, RS-422, RS-485
- Plug-In Interfaces for the VME Bus.
- Frame Grabber/Image Processing Interfaces
- PC Based Test Instruments
- Plug-In Interfaces for Apple Macintosh Computers
- Industrial Control Interfaces for IBM PC/XT/AT and VME Bus
- Data Acquisition and Control Software Packages
- Signal Conditioning Modules and Transmitters
