DC260 Zoom Camera
with Picture Easy Software 3.0

*P*rofessional performance in a personal camera.

The amazing KODAK DIGITAL SCIENCE DC260 Zoom Camera does almost anything you can imagine. And some things you can't. It puts a world of picture-taking power in the palm of your hand.

Start with Megapixel Plus picture resolution and a powerful 3X optical plus 2X digital zoom lens. So you can capture enough detail for photo-realistic 8" x 10" pictures with spectacular color and sharpness.

It also allows you to do things most ordinary cameras can't, like multi-picture burst, time lapse, and audio recording. With Digita™-compatible scripts, you can even customize your camera to perform a specific series of functions that you choose. Add features you'd expect from traditional cameras like flash sync and exposure adjustment, and you've got one incredible camera.

FEATURES/BENEFITS

Megapixel Plus Technology

1.6 million (1536 x 1024) pixels per image provide spectacular detail, color, and sharpness. Ensures unbelievable image quality by giving you enough detail for photo-realistic 8" x 10" (20.3 cm x 25.4 cm) pictures.

3X Optical plus 2X Digital Zoom

Helps you get closer to your subject. The lens can extend to 3X magnification, but the camera can digitally "zoom in" to 6X — which you can preview in the LCD when you take the picture.

Burst Feature

Takes sequential pictures at the touch of a button: up to eight pictures at standard resolution, two pictures at high resolution. Great for any action situation, from a golf swing to an industrial process.

Flash Sync

Lets you connect to an external flash, giving you more of the capabilities of a traditional, professional camera.

Picture Albums

Software embedded into the camera lets you create "digital photo albums" to help organize images. Choose which album you want the picture stored in before or after you take the picture.

Scripting Capability

It's like software for your camera! This intelligent camera can perform a series of pre-set actions that you choose. So you can customize it to your needs and execute complex operations with "point-and-shoot" simplicity. Scripting can tell the camera exactly what to do. Take multiple pictures at pre-determined intervals. Program camera settings for different picture-taking conditions. Or tag images to help organize pictures and improve workflow with your software applications. Scripting gives you more creative control, making it faster and easier to take quality pictures.

Time-Lapse Mode

Lets you program your camera to take a sequence of pictures at consistent time intervals.

Audio Record and Playback

Lets you record audio to accompany your photos. Ideal for annotating pictures with relevant information, so you don't have to write down the details.

KODAK DIGITAL SCIENCE Picture Easy Software 3.0

Included with your camera, it makes using, storing and sharing digital images effortless and efficient. And allows you to print your pictures in a variety of layouts.

Other useful, valuable software included

- PHOTODELUXE Software from Adobe Systems, Inc.
- PAGEMILL Software from Adobe Systems, Inc.
- WINDOWS 95 and NT 4.0 Mounter
- TWAIN Acquire Module

Interface and LCD

Clear, menu-driven interface is easy to navigate. The mode dial allows you to easily select the function you want to access: Capture, Review, Connect, or Info. And the 2" color LCD allows preview, quickview and review of images.

8 MB Picture Card

Store up to 95 pictures on each card. When it's full, simply remove it, insert a new one, and keep shooting. It's like a reusable digital roll of film for your camera.

Maximum Flexibility

USB, serial, PC Card, and IrDA interfaces. Video out. JPEG and FLASHPIX File Format support. AC adapter and batteries included.

KODAK DIGITAL SCIENCE DC260 Zoom Camera with Picture Easy Software 3.0

SPECIFICATIONS

CCD Resolution	1548 x 1032 pixels
Image Resolution	1536 x 1024 pixels, 1152 x 768 pixels, 768 x 512 pixels
Image Compression	Best, better, good
Image Storage	8 MB KODAK DIGITAL SCIENCE Picture Card included. Stores up to 95 pictures
Viewfinder	2.0" TFT color LCD for review and preview, plus real-image optical viewfinder
Lens	Auto focus 3X zoom
Digital Enhancement	2X digital zoom
Lens Focal Length	38 mm to 115 mm equivalent
Focus Range	12" (0.3 m) to infinity
Exposure	Auto or manual exposure (+/- 2 EV in 0.5-EV increments) with automatic white balance
Shutter Speed	1/4 to 1/400 second
Aperture Range	Wide: f/3.0 to f/14.0; Tele: f/4.7 to f/22.0
ISO Equivalent	100
Scripting	Digita text-based language, extends functionality by automating camera

Burst Capture	Max 2 pictures at high and medium res, max 8 pictures at standard res, frame rate selectable from 0.1 to 3 frames per second
Time Lapse	Set to capture shot at pre-defined intervals; play back as movie on camera
Orientation Sensor	Automatically rotates image right-side-up at LCD and host
Picture Overlay	Time/date stamp, text, logo/graphic; user-selectable location
Albums	In-camera albums keep pictures organized. Albums transfer to Picture Easy 3.0

Tripod Mount	Standard
Flash	Strobe flash (auto, red-eye, fill, off); range up to 9.8' (3.0 m); optional flash sync cable supports external flash
File Formats	JPEG (EXIF), FLASHPIX
User Interface	Graphical, menu-driven, easy to navigate
Video Out	NTSC, PAL; live view
Audio	Record and playback

Interface	Serial, IrDA (camera-to-camera or camera-to-PC), USB, PC Card
Power	4 AA batteries, AC adapter (included in box)
Dimensions	4.6"(w) x 2.2"(d) x 4.2"(h); 118 mm (w) x 57 mm (d) x 106 mm (h)
Certifications	VCCI, CE, FCC Class B, C-Tick, ICES-003 Class B, CCIB
Weight	1.2 lb. (525 g) without batteries
Warranty	One year

PACKAGE CONTENTS

- KODAK DIGITAL SCIENCE DC260 Zoom Camera with hand strap and lens cover
- 8 MB KODAK DIGITAL SCIENCE Picture Card
- AC Adapter, 4AA batteries
- Serial cable for use with WINDOWS Systems
- USB cable
- Audio/video cable
- CD-ROMs containing software
- Quick setup card, user's guide
- Registration cards, extended service offering

SYSTEM REQUIREMENTS

WINDOWS Systems

- WINDOWS 95 or NT 4.0 Software
- PC with 486/66 MHz microprocessor or PENTIUM Processor
- 16 MB or more of RAM
- 50 MB hard disk space available
- CD-ROM drive
- Available serial port, USB port, IrDA connection or PC card reader

MACINTOSH Systems

- PowerMacintosh System, MacOS 7.5.3 or later
- PC Card reader and CompactFlash card adapter
- 32 MB or more of RAM
- 10 MB hard disk space available
- 640 x 400 pixel display (1024 x 768 recommended)
- ADOBE PHOTOSHOP Software 3.0.5 or later

Picture Easy Software requirements:

- PC with PENTIUM Processor 90
- WINDOWS 95 or NT 4.0 Software
- 16 MB RAM
- 70 MB hard disk space available
- 256-color monitor (thousands of colors recommended)

USB
UNIVERSAL SERIAL BUS
