Daisy Wheel Printer HR-20

The Brother HR-20 is an outstanding value. It produces excellent letter quality text and is compatible with all of the best selling personal computers and software. In addition to having a very attractive list price, the Brother HR-20 offers many unique user benefits not available on any printer at any price.

Automatic cut sheet feeder

Copy Function:

The Brother HR-20 features a unique copy feature. Documents can be retained in the memory of the Brother HR-20 and, at the touch of a button, reprinted time and time again. When several originals of a document are needed, or the red printing is being used, it is not necessary to tie up the computer to reprint documents.

Two Color Printing:

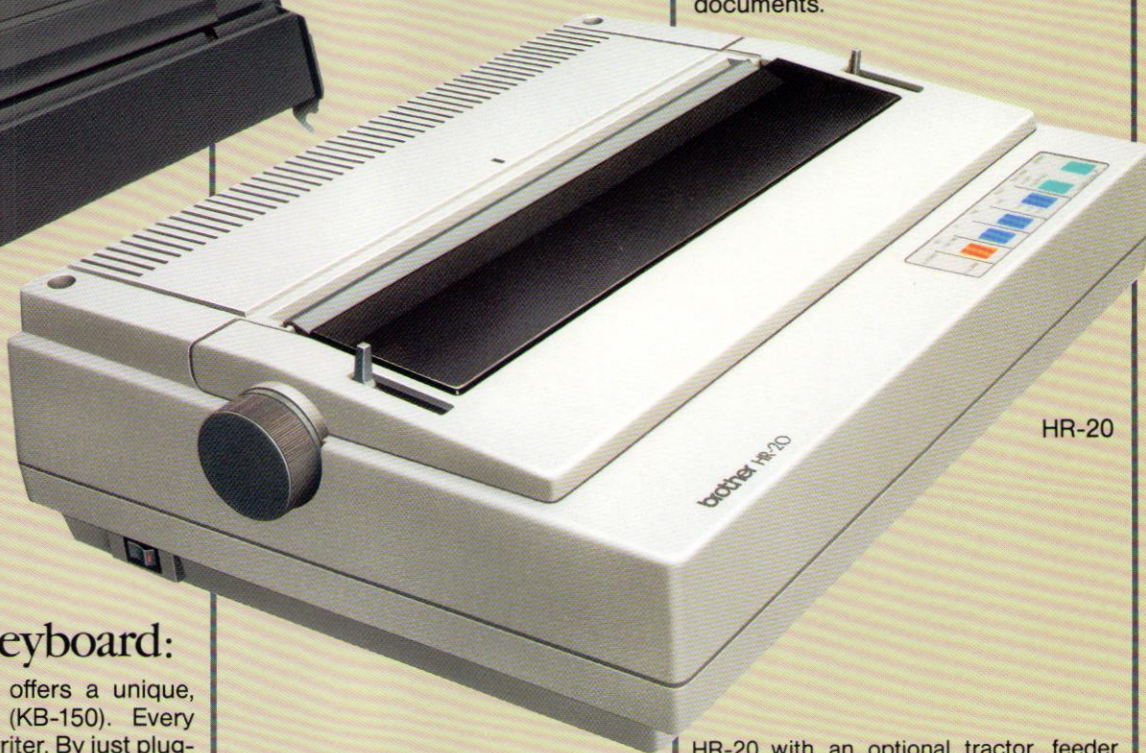

The Brother HR-20 features unique two color printing. Text can be highlighted in red, so that it literally jumps off the page!

Cassette Daisy Wheel:

The Brother HR-20 uses the innovative and unique Brother cassette daisy wheel. Protected in a cassette, the Brother daisy wheel is not only easy to change, but many times more durable than conventional print wheels.

Paper Handling:

The Brother HR-20 is a complete printer, offering a complete selection of paper handling accessories. With the touch of a button, the Brother HR-20 automatically inserts single sheets. Via the optional forms tractor (TF-150), the Brother HR-20 feeds continuous forms. Via the optional cut sheet feeder (CF-150), the Brother HR-20 feeds single sheets automatically for efficient printing of multi-page documents.

HR-20

Optional Keyboard:

The Brother HR-20 offers a unique, optional keyboard (KB-150). Every office needs a typewriter. By just plugging in the optional keyboard, the Brother HR-20 becomes a self-correcting, electronic typewriter.
