

QUME

Laser printing the easy way.

- 10 pages per minute
- Letter-quality text combined with 300x300 dot-per-inch graphics
- Allows 19 cartridge-loaded or down-loaded type fonts per line
- Compatible with all major business computers and word-processing systems
- Dual-processor controller handles both single-user and multi-user systems
- Compatible with most business software without modifications
- Low cost of ownership—drum and developer cartridge last 30,000 pages
- Easy-load toner cartridge lasts 5,000 pages
- Input paper tray holds 250 sheets
- All expendable supplies user-replaceable without tools
- Convenient automatic front loading and collated top stacking, with manual

feed available for envelopes and transparencies

- Up-front panel with familiar operator controls and indicators

Qume LaserTEN™ business printers are the first laser printers designed from the start to fit effortlessly into your business computer system, your business software, and your business environment.

Qume LaserTEN printers were engineered specifically to serve as high-production business machines, serving either individual or multi-user computer systems. They are easy to install, comfortable to work with, inexpensive to operate, and highly

durable to provide long and trouble-free service life, even with constant use in clustered workstation environments.

Qume LaserTEN printers produce 10 pages per minute of true letter-quality text. An integral automatic sheetfeeding system with 250-sheet tray capacity allows virtually unattended operation.

With the introduction of the LaserTEN business printer and the LaserTEN PLUS™ enhanced graphics printer, Qume has dramatically raised the standard of operational efficiency and cost-effectiveness in laser printing. Whether they serve an individual PC or a whole department of workstations, LaserTEN business printers rate a perfect 10 for your office needs.

LaserTEN™

Business Printer

LaserTEN™

10 PPM laser business printer

Qume's decade of experience as a world leader in letter-quality business printers is evident throughout the LaserTEN business printer.

Simple plug-in interface modules make LaserTEN printers instantly compatible with all major business computers and word-processing systems, including multi-user systems and networks.

Emulations of popular laser, daisy-wheel and dot-matrix printers eliminate software modifications. And a higher performance laser engine and proprietary dual-processor controller provide the Qume LaserTEN with the power and flexibility to meet ever-increasing system and production demands of multi-user environments.

The Qume LaserTEN is an economical choice for offices with up to 5,000 page/month requirements for letter-quality text and 75-300 dpi graphics. The LaserTEN PLUS offers extended 300 x 300 dpi graphics image size and enhanced graphics flexibility at slightly higher cost.

LaserTEN supplies, accessories and service are widely available through Qume's established network of authorized service centers and dealers.

We will be happy to give you a hands-on demonstration.
