

# FoxToolBox™ & FoxBASE+™ 2.1

Convert your single-user application to multi-user FoxBASE+.

**FoxToolBox & FoxBASE+ 2.1**  
are the perfect development team.

**ANALYZE OR THOROUGHLY DOCUMENT.**  
Check your existing application or your HOT NEW FoxBASE+ 2.1 Program that was generated by the FoxToolBox. Blocking Diagrams, Cross Reference of Variables, Data Files and Index Files. Listing of your Data File Structures with an Index Listing and a Table of Contents so you can bind your listings into a true document. You can even print a Structure Chart of your PRG modules for a diagram look at the flow of your program or you can print a TREE Chart for a quick flow diagram.

**SINGLE TO MULTI-USER CONVERSION.**  
You can convert your Single-User application to Multi-User by having the FoxToolBox add in all the necessary Record and File Locking Syntax including Shared and Exclusive Access Code. FoxToolBox Code converts very easily to a Multi-User system. In addition, there is great documentation on Multi-User conversion.

**FoxBASE+ 2.1 PROGRAM GENERATION.**  
Code for FoxBASE+ 1.x, 2.0 and 2.1 can be generated for you by the FoxToolBox. Screen Composition with or without a MOUSE. Menus that include BAR MENUS 2.0 and even PULL DOWN BAR MENUS 2.1 so your applications can have the FoxToolBox look. An extra difference is that all code generated is PROCEDURE oriented. Procedure files are what makes FoxBASE+ the fastest around.

**FoxBASE+ 2.1 REPORT WRITER.**  
A full-featured REPORT WRITER. Generates complete SOURCE CODE so you can achieve the power, flexibility and versatility that you really need.

**FoxBASE+ 2.1 FORMS MAILMERGE.**  
Allows you to create FoxBASE+ source code that reads in standard TEXT files and MailMerge these files with your DBF files for mass mailing.
