

Scroll & Recall™

Screen & Keyboard Enhancement Utility for the IBM-PC, XT, AT & Compatibles

Wouldn't it be nice if you could scroll back through data that has gone off the top of your display screen any time you wanted to?

Wouldn't it also be nice if you could easily recall your previously entered DOS commands and other data lines so that you could change and re-enter them without retyping?

Just think of the time you would save, convenience you would gain and errors you would avoid. Well Scroll & Recall allows you to do just that!

Scroll & Recall provides two major functions not available in DOS:

- 1. It gives you the ability to scroll back through data that has gone off the top of your display screen. You can also save the current screen contents at any time and scroll back to it later.*
- 2. Scroll & Recall will save your DOS command lines and other input lines as you enter them. You can easily recall these lines, edit them if necessary and re-enter them with the stroke of just a few keys.*

Scroll & Recall is very easy to use and is fully documented. It is a resident program that is always there when you need it.

Scroll & Recall is compatible with monochrome and graphic displays. It requires an IBM-PC, XT, AT or compatible computer, DOS and one disk drive.

\$69 -  , Check, Money Order, COD or Purchase Orders.

Scroll & RecallTM

Screen & Keyboard Enhancement Utility for the IBM-PC, XT, AT & Compatibles

Features/Specifications

General

Scroll & Recall is a screen and keyboard enhancement utility program. This utility makes your work easier by providing facilities not available under DOS. The two major functions that Scroll & Recall provides are:

1. The ability to scroll back through data that has scrolled off the top of your display screen.
2. The ability to recall, edit and re-enter your previously typed DOS commands and other keyboard input.

Scroll & Recall is a resident program. This means that once loaded, it is always available for your use.

Screen Enhancements

As data is scrolled off the top of your display screen Scroll & Recall captures this data in a memory buffer. You can easily scroll back through this data at any time.

In addition to saving data that scrolls off the top of the screen, you can save the entire screen image into the memory buffer anytime by simply pressing Ctrl-Return. Saving the entire screen in this way is especially useful for programs that do not scroll their data.

The number of screens of data to be saved can be specified when you load Scroll & Recall.

The data that is contained in the buffer can be saved to a disk file. This file can then be printed, edited or processed in some other manner.

Keyboard Enhancements

The keyboard enhancement facilities of Scroll & Recall allow you to easily recall your previously entered DOS commands and other input lines. These lines can then be edited and re-entered.

Two modes of editing are provided. One uses the same editing commands that are available on the standard DOS command line. The other mode provides enhanced editing with facilities similar to those of the BASIC editor.

You can specify the amount of memory to be used for saving keyboard input when you load Scroll & Recall.

Compatibility

Scroll & Recall is compatible with both the IBM monochrome and color graphic displays used in the 80 column mode.

Scroll & Recall has been tested with many other resident programs such as Prokey and Sidekick and no incompatibilities have been found.

Requirements

Scroll & Recall requires an IBM-PC, XT, AT or compatible computer with one disk drive and PC-DOS (MS-DOS).

Miscellaneous

Scroll & Recall is written in assembler language for efficiency and compact size. It is supported by a full time staff of highly trained professionals.

The Scroll & Recall Software package contains the programs on a 5¼ inch diskette in IBM-PC format, along with the user's manual, all packaged in a custom vinyl folder.

Scroll & Recall is not copy protected and may be copied for backup purposes.

Scroll & Recall is compatible with Hard Disk systems.

Any future enhanced versions of Scroll & Recall will be offered to all registered users at a substantial discount.

How to Order

Scroll & Recall can be ordered directly from Opt-Tech Data Processing.

The retail price of Scroll & Recall is \$69.

VISA, Master Card, Check, Money Order, COD and Purchase Orders are accepted.

Scroll & Recall is a professional quality program that will increase your productivity by reducing errors and saving you many hours of valuable time.
