

Seagate's ST157 Family

THE FINE ART OF DISC DRIVES

Oil painting by
Francis Livingston
San Anselmo, California

As the storage and retrieval device for

valuable information, a disc drive plays a critical role in a personal computer's overall operation. Building hard disc drives that deliver both high performance and high reliability requires the same degree of precision employed by skilled artists.

This precision is reflected in every Seagate ST157 family drive. Using our own stepper motor processes, each drive is auto-tuned for optimum performance every time the drive is powered up.

This 21-49 megabyte 3.5" drive family is a skillful blend of performance and reliability. With access times of 28 msec, these drives feature an MTBF of 70,000 hours, and are available in SCSI, ST412 and AT[®] interfaces.

Like the artist who spends years perfecting his craft, Seagate has spent the past decade mastering the fine art of disc drives. For more information on our palette of high quality storage solutions, contact your authorized Seagate distributor, or call Seagate directly at 800-468-DISC, or 408-438-6550.
