

LOGITECH'S DESKTOP TOOLS POWER YOUR DESKTOP

Logitech's Desktop Tools make it a snap to put the power of your computer to work for you. These hardware and software products let you get more done in your average 40-hour week, and they're so affordable, they'll fit any budget. Logitech's Desktop Tools make computing such fun you'll want them on your system, at home and at the office.

ScanMan® Family of Hand-Held Scanners for IBM or Macintosh systems

The fast, easy way to use any images, even photos, to dress up your documents. Use with popular O.C.R. packages to scan text and use it in applications.

CatchWord™ Intelligent Character Recognition Software

Powerful and affordable, CatchWord turns ScanMan into a valuable data-entry tool by translating scanned text into a format that can be used in all your applications, just like text entered with the keyboard.

Logitech™ Series 9 Mouse

The curve of this mouse fits your hand comfortably and its three buttons, adjustable cursor sensitivity and enhanced tracking make it a snap to get everything done more easily. Includes Pop-Up Dos™. Guaranteed compatible with all application software.

TrackMan™ Stationary Mouse

This revolutionary thumb-operated stationary mouse offers comfort, convenience and precision without taking up your precious desktop space.

Finesse® Desktop Publishing Software

Use Finesse for flyers, memos and letters with flair. Add images directly into Finesse with ScanMan. Includes Bitstream® Fontware™ for the best possible output on any printer.
