

*Protect your investment
with original
Mannesmann Tally® supplies.*

Using ribbons or supplies that don't measure up to Mannesmann Tally's exacting specifications could damage your printer. For example, inexpensive inks may clog the print head. Or, using ribbon cartridges that don't fit properly could jam the print mechanism.

To play it safe, we recommend using only genuine Mannesmann Tally supplies. We take the same precision-engineered quality approach with these as we do with our entire printer line.

So whether you're looking for a new ribbon cartridge or MT910 laser supplies, the Mannesmann Tally name on each of the products above assures you of an enduring commitment to quality.
