Getting It All Together

Welcome to our Fall catalog and a very special, limited-time offer.

To help you stay organized in this busy season, we've put together a special "bundle" sale combining our best-selling Calendar Creator Plus, Address Book Plus, and Top Priority software packages.

From now until October 31st, choose any two of these time-savers—and save \$60. Choose all three and you'll save \$113—plus we'll add a genuine leather Day Timers® organizer FREE!

Individually, each program makes your life much easier to manage. Together—especially when you use their printouts in a personal organizer—these programs provide truly amazing control over dates, schedules, names, numbers, and to-do lists.

Our offer is completely risk-free. If your bundle fails to please, just return it complete within 30 days for a no-questions-asked refund.

Order today. I guarantee you'll be glad you did.

Sincerely,

Ed Lauing
President

P.S.: If you already own one program, try the other two—and save!

Power Up!

Unique bestsellers direct to your door, with armchair convenience!

Bestsellers and You: We develop, publish, and constantly update our bestselling line of easy, intuitive software—all with computer users like you in mind. That's why our Calendar Creator Plus, Express Publisher, Top Priority, and Address Book Plus programs now reside on several hundred thousand computers. And we add new titles all the time.

Value and Convenience: including great weekly phone specials available only when you place your order direct with Power Up. Place your order any way you choose: phone, mail or fax. We ship your in-stock order by the next business day.

PHONE: 1-800-851-2917 7AM-5PM Pacific Time, M-F.

FAX: 1-415-345-5575

**MAIL: Power Up, P.O. Box 7600,
San Mateo, CA 94403**

Heart of Silicon Valley: Located where it all started, we comb the software marketplace—Silicon Valley and beyond—to find and test unique software and peripherals to help you power up your computer. We strive to make your life easier, more productive, and more organized—all without long learning curves or false starts. If it's in the Power Up catalog, it's guaranteed to be great!

Hassle-Free, Professional Service: Our highly trained customer service reps are here to help you before and after you order. Our no-questions-asked guarantee* eliminates risk, and our expert toll-free product support is yours when (and if) you need it.

Personal Organizer!

Three Great Programs, One Great Solution

Q: What makes a personal organizer so valuable?

A: It's a single, handy source for everything you need to stay organized at work and at home—calendars, phone books, to-do lists, and more. Unfortunately, with everything hand written, your calendar and phone book quickly become jumbles of scratches and scrawls, and your to-do lists have to be rewritten—by hand—every day.

Q: What makes a personal computer so valuable?

A: It's the most powerful tool you can get for storing, managing, and analyzing information. Unfortunately, even the smallest personal computer is no match for an organizer when it comes to convenient portability and easy access to information.

Now there's a way to combine the *convenience of the personal organizer* with the *power of the personal computer*: Calendar Creator Plus, Top Priority, and Address Book Plus.

Each program is terrific on its own. Together, they make a total system for bringing your computer and organizer into close harmony—and giving you full control of your busy life.

Calendar Creator Plus, the #1 calendar program on the market, prints dozens of calendar types to fit every kind of organizer (see page 2 for a full description).

Top Priority, our unique to-do list manager creates organizer-size printouts and exchanges data with Calendar Creator Plus (details on page 6).

Address Book Plus Software, the easiest way to manage names and numbers, creates perfect printouts for your organizer (see page 3).

PICK YOUR OFFER AND SAVE UP TO \$113!

■ **OUR FIRST OFFER** ■
(total value \$159.90)

Make better use of your valuable time with our clever time-and-task manager.

Top Priority

It often seems that there are more "things that have got to get done" than there is time available in which to do them. Too much time is wasted in creating and revising goals, projects, schedules—and the to-do lists that go with them. Sooner or later, even the most organized person can't stay organized.

Now you can get better control over your busy life. *Top Priority* lets you enter and organize activities, projects, and goals in any way that helps you work most effectively. Organize by project, time-frame, or any other way you like. Give each task a priority, description, date, and start and end time. Take all your lists and merge them into daily to-do lists, so that large projects and goals appear as smaller, more easily achievable tasks each day.

With *Top Priority*, your information is constantly at the ready for nearly instant up-dating. It's so efficient that if you don't finish a task, the program carries it over to the next day's list for you. It warns you in advance of deadlines, birthdays, and other upcoming events. And it schedules recurring events automatically.

You can choose to "filter" your information by any category you personally assign—calls to make, things to buy, letters to write. You're in charge of the way *Top Priority* delivers the information.

Top Priority can also run in memory-resident mode, where it's always at your fingertips. Add, delete, or update your lists without ever leaving the program you're in. You can also transfer data between *Top Priority* and *Calendar Creator Plus* to create high-impact weekly and monthly calendars. And it's easy to import and export ASCII files from other programs.

Daily and weekly to-do lists, goal and task completion reports print in a variety of formats and sizes—including sizes that fit your DayTimer,® Lefax® or other organizer.

Time marches on, but with *Top Priority* you're always a step ahead.

Top Priority only **\$79.95**

Order #2004B for 5.25" disk, or #2004A for 3.5" disk.
Requires 384K of memory; memory resident module requires 120K.

Calendar Creator Plus Owners!

Send us the title page of your manual, and get *Top Priority* for ONLY \$49.95.

Please add \$4.95 shipping and handling. Offer expires 1/15/92. Be sure to specify disk size when ordering.

BONUS OFFER

See page 5 for savings up to \$113

Quick Schedule Plus

Our best-selling Gantt-chart software gives you presentation-quality project schedules in minutes.

Creates easy-reading Gantt-charts in minutes

Simple design avoids the complexity of expensive project tracking packages

Draws charts directly on screen, then prints what you see

Provides formats from wall-size to tiny

When we first introduced *Quick Schedule Plus*, it was an instant winner, especially with busy managers who needed to create easy-to-understand project schedules quickly. Like most of us, these people didn't have the time to learn expensive, complicated project software.

Regardless of the size or scope of your project, the Gantt-chart format of *Quick Schedule Plus* lets you clearly show each project element, its duration, and its relationship to other elements with a clarity anyone can understand.

You can set up project schedules, team assignments, and much more the very first time you run the program. And it couldn't be simpler to learn and use. You begin by choosing a project name, a start date, and a time scale in years, months, weeks, days, hours—even minutes. Then you draw task bars directly on the screen.

Right on your screen, you can alter any task as needed. Shorten or lengthen it, rearrange it, delete it, or add a new one. A 20-line, pop-up "notecard" of relevant information can also be added to any task. And notecards can be printed below your schedule, for a quick recap of all tasks. Time scales can be reproduced at the bottom, and row headings can be repeated at the right, for easy reading. Task Reports present tasks alphabetically, by start date, or by location on your schedule.

Quick Schedule Plus organizes your data in the way that suits you best—then prints it in a wide variety of sizes—from small, personal organizer sizes to wall-size schedules—on dot-matrix or laser printers. Expanded display support shows schedules up to 50 lines deep at once with VGA systems; 43 lines deep with EGA systems.

No matter how intimidating your schedule, *Quick Schedule Plus* will cut it down to size—easily and efficiently. Try it, and you'll see!

Quick Schedule Plus only \$99.95

Order #2355H for 5.25" disk, or #2355F for 3.5" disk.

Requires 512K of memory. Supports HP LaserJet II & III; IBM Graphics and Proprinter; Epson, Panasonic, and Okidata dot-matrix; C. Itoh Prowriter; NEC 8023; Toshiba P321, 351. No graphics card required.

SAVE \$50!

Quick Schedule Plus & Top Priority TOGETHER ONLY \$129.90

Order #4830B for 5.25" disks, or #4830A for 3.5" disks.

CD-ROM breakthrough: Be

Turn Your PC into an information powerhouse—with CD-ROM!
Our bargain packages put a 21 volume encyclopedia, a 200,000 word dictionary, 100,000 magazine articles, a world atlas—and much more—at your fingertips. You'll save hours and hours of research time. Choose your favorite package—and place your order today!

When you order one of our great new CD-ROM packages, you get everything you need to access a massive reference library. Just connect the low-profile Magnavox player, pop in a disk, and go. Each disk runs as a separate application, giving you all the commands you need to perform instant searches and retrievals. You quickly find the information you want and move it where you need it—for editing, merging, or printing.

Best of all, our new packages get you into CD-ROM at an amazingly low cost. Here's what you get:

Simply the Lowest-Cost CD-ROM Packages Available

With each bundle, we include the latest Magnavox CD-ROM drive. Package A includes the drive plus a complete four-reference starter library. It costs only \$549—and saves you \$969 over the retail cost. Package B includes the drive, the software from Package A, plus four more products. You pay only \$149 more, but your savings jump to \$2000! You won't find a better CD-ROM value in any store or with any other mail order supplier.

SAVE \$969!
Package A

Magnavox CD-ROM Drive	\$ 549.00
Groliers Encyclopedia	\$ 395.00
MS Reference Bookshelf	\$ 199.00
PC Globe	\$ 79.95
PC Sig Library	\$ 295.00
Total Value:	\$1517.95

Order #M0730

ONLY \$549!

Package also available with internal drive: only \$699 (order #M0720)
 Individual disks available at listed prices.

The New Magnavox Audio-Compatible CD-ROM Drive

Truly, this new Magnavox CD-ROM drive is your link to an incredible world of information and fun. Included in Packages A and B, the Magnavox CDD461RS gives you fast access time for quickly locating the information you want. It's audio-compatible, too: a front-panel headphone jack and rear-panel line output jack let you hook it to your stereo system and play your favorite audio CDs. In fact, this is the first CD-ROM drive to offer front-panel audio controls—so it works just like a home stereo CD player, and you can use it even when it's not connected to your computer.

Unlike many drives, the Magnavox requires no clumsy disk caddy, so it's as easy to use as an audio player. The low-profile case makes a perfect monitor stand, and the office-standard putty color harmonizes with most computer equipment. The included interface card and driver are a snap to install. Everything comes with a one-year parts and labor warranty. And if you want to mount the drive in your computer, we offer an internal drive, too. See the price boxes above and below.

CD-ROM makes paper reference materials obsolete! On just a few silvery disks you can get all the information shown here—and more. Try our new CD-ROM packages and discover the pleasure of nearly instant access to information that used to take hours to find.

SAVE \$2000!
Package B

Magnavox CD-ROM Drive	\$ 549.00
Groliers Encyclopedia	\$ 395.00
MS Reference Bookshelf	\$ 199.00
PC Globe	\$ 79.95
PC Sig Library	\$ 295.00
Game Pack	\$ 99.95
Magazine Rack	\$ 89.95
US History	\$ 395.95
Bible Library	\$ 595.00
Total Value:	\$2698.80

Order #M0760

ONLY \$698!

Package also available with internal drive: only \$849 (order #M0770)
 Individual disks available at listed prices.

Best bundles! Best prices!

Package A: Magnavox Drive Plus Four Complete References

21-Volume Groliers Encyclopedia. Nine million words and 33,000 articles give you the latest information on science, the arts, geography, medicine, health, sports, politics, and more—all on a single disk. Up to ten windows allow for researching several topics at once. Split screens let you view articles side by side. It's faster and easier than using bulky books, and it all fits in the palm of your hand.

PC Globe. Zero in on any region of the world to view maps or retrieve data with this feature-packed CD-ROM atlas. World, continent, and regional maps—including 190 country maps—provide graphical information in selectable colors. Database information includes population, languages, ethnic groups, religions, health statistics, economic data, political organizations, travel requirements, tourist attractions, and more. Utilities calculate currency conversions, time zone differences, and city climates. It's a complete atlas and travel planner on one CD-ROM disk.

Microsoft Reference Bookshelf. Now ten of the most popular reference books are right at your fingertips—instead of collecting dust on your shelves. You get *the American Heritage Dictionary*, *Roget's II: Electronic Thesaurus*, *Bartlett's Familiar Quotations*, *the Chicago Manual of Style*, *the Houghton-Mifflin Spelling Verifier and Corrector*, *Forms and Letters*, *a U.S. Zip Code Directory*, *the Houghton-Mifflin Usage Alert*, and *Business Information Sources*. Forget about spending hours flipping through reference books—now you're just seconds away from answers to your questions.

PC-SIG Library. This massive library of software contains the equivalent of 2,485 floppy diskettes of the highest quality user-supported PC shareware and public domain programs. You get software for word processing, spreadsheets, databases, teaching, business and finance, communications, languages, utilities, graphics, games, entertainment, windows, desktop publishing, and networking. With PC-SIG, when you need a special application, you just slip in a disk and go.

The Magnavox CDD461RS Drive:

- Fast access time
- Requires no caddy
- Audio compatible, with front panel controls
- Low-profile design: 3 1/2" high
- Matches your computer equipment

Package B: Includes Package A, plus an additional \$1180 worth of software & information!

CD Game Pack. When you're ready to take a break, just pop this 5-game disk in your drive and have a little fun. *Chessmaster 2000* accommodates any level of chess player. *Bruce Lee Lives* puts you in the ring against the master with full-color EGA/VGA graphics. *Gin King* and *Cribbage King* satisfy even the most ardent card player. *Life & Death* puts the surgeon's scalpel in your hands in a medical game scenario. And *Beyond the Black Hole*

launches you into a web of intergalactic challenges, puzzles, and tricks in stereoscopic 3D.

Magazine Rack. Slide this disk in your drive and you've got access to more than 100,000 articles from more than 300 periodicals. Full search and retrieval software locates information in four areas of coverage—general interest, business, health, and computers. Excerpted magazines include *U.S. News & World Report*, *Stereo Review*, *Good Housekeeping*, *Runner's World*, *Home Office*, *PC/Computing*, and many, many more. You'll save hours of research on just about any topic—whether you're thinking about science or a new stereo.

U.S. History. This single disk holds more than 100 texts spanning U.S. history from the arrival of the first Native Americans to the present. More than 1000 photographs, maps, and tables provide complete historical illustration. A variety of historical perspectives—political, social, military, and economic—zero in on the reference material you want in minutes, not hours.

Bible Library. This is one of the most complete religious resources available anywhere. You get nine Bible versions, six sermon outlines, two Bible language dictionaries, three word studies, plus many other useful Bible study references. Instant retrieval functions locate the information you need. A comprehensive translation package shows how to read, pronounce, and compare translations from any language, based on the original Bible language. Spend minutes—not hours—performing some of the most in-depth Bible research with this single CD-ROM disk.

Special Days

Historical insight that's fun and informative
—perfect for that special gift!

What was happening in the world the day you were born—or when Joe joined the firm? Get the answer fast with *Special Days*. Its quality one-page reports highlight headlines, songs, awards, people, consumer prices, and events for any day from 1850 to present times.

Choose Birthday, Anniversary, or Flashback reports. They make perfect birthday and anniversary gifts. They're great for friends, relatives, employees, and associates. They're terrific for students. And the information they provide helps give newsletters, commemorative speeches, and other "this-day-in-history" applications real insight and authenticity. You get instant historical context for just about any person, place, or thing.

Try *Special Days*—and give the gift of history.

Special Days only **\$44.95**

Order #H2312 for 5.25" disk, or #H2311 for 3.5" disk.

Published by Salinon Corporation. Requires DOS 2.1 or later.

Certificate Pak only **\$12.95**

100 pages of pin-feed parchment paper, plus stickers and seals. Order #M0460.

Special Days creates three kinds of preformatted reports. They make wonderful gifts.

NEW! AUTOMAP

Fun, fast, travel planning on your PC.

Plan your next trip quickly and easily with *AUTOMAP*, the PC travel planner. Just tell *AUTOMAP* where you're starting and where you're going—plus any stops or places to skip. *AUTOMAP* plans your trip for the fastest, most efficient drive—or the most scenic. Then it prints your travel plan with clear directions, detailed maps, a mileage chart, and estimated drive time. You can actually save up to 20% on drive time and expenses.

AUTOMAP's full-color maps include 359,220 miles of U.S. freeways, tollways, and state and county roads. Zoom in to find state capitals, parks, mountains, forests, lakes, historic sites, monuments, American Indian reservations, and game reserves. It's like having an expert travel guide by your side.

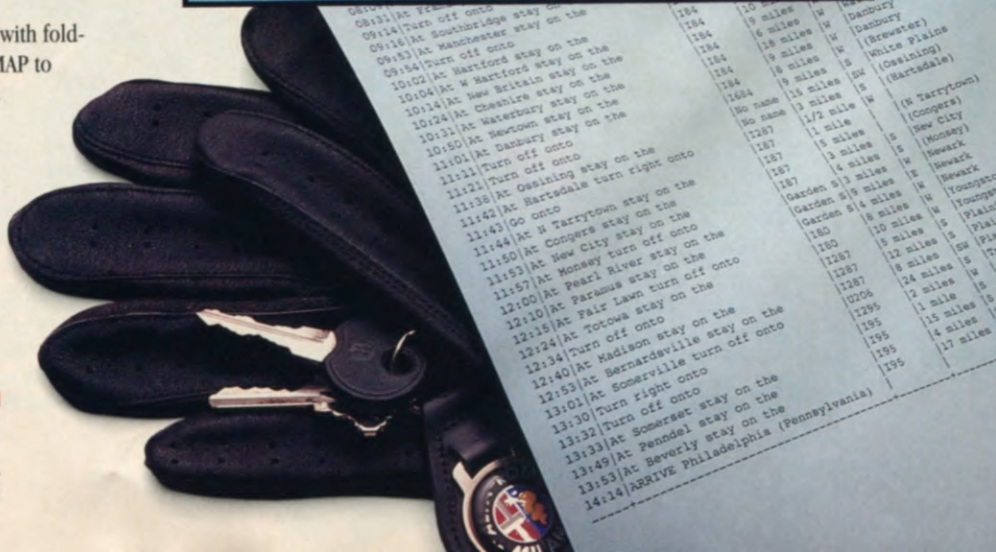

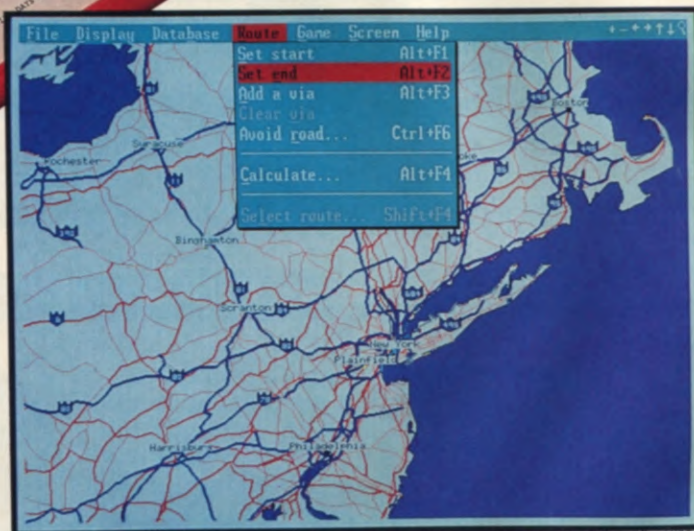

AUTOMAP also provides state and city populations, laws of the road, and information hotlines for road conditions, weather, tourist attractions, hotels, and car rentals.

The next time you travel, forget about fumbling with fold-out maps and mileage charts. Instead, use *AUTOMAP* to plan your next trip quickly and easily. It's fast, it's accurate, and it's fun.

AUTOMAP only **\$99.95**

Order #H3672 for 5.25" disk, or #H3671 for 3.5" disk.

Published by AUTOMAP Incorporated. Requires 512K of memory; a hard disk (uses 4MB) and a 5.25" 1.2Mb or 3.5" 720K floppy drive; and super VGA, VGA, EGA, CGA, or Hercules graphics.

o—and in history!

NEW VERSION! Roots III

Now easier and better than ever, the leading genealogy tracker moves ahead with WordPerfect compatibility and more.

Easy enough for amateurs, powerful enough for professionals, *Roots III* provides a complete framework for presenting the most complex family data. You can create easy to read reports and charts based on names, locations, years, and more—even publish formal family histories. Now, with WordPerfect and Word for Windows file compatibility, plus even faster processing, *Roots III* is better than ever.

Pedigree charts can fit up to six generations on a single page. Ancestor charts let you easily calculate blood relationships between any two subjects. And *Roots III* quickly searches through thousands of family records to find the information you need.

Working with *Roots* is even more rewarding when you use its utility packages. Package 1 includes *Roots Writer*, a text editor that works in the *Roots* screen, and *Revent*, which displays the historical events connected with any day of the year.

Package 2 includes *Historiograph*, providing graphic timelines that show what the world was like during the life of anyone shown on the *Roots* screen. You also get *Calendar*, which converts Gregorian, Julian, Hebrew, and Republican dates.

Whether you're interested in genealogy as a hobby or a business, there's simply no substitute for *Roots III* when you want complete start-to-finish power.

Roots III SAVE \$50!

NEW! Verse Search 5.0

State-of-the-art guide to the Bible.

Verse Search 5.0 is the most powerful Bible program on the market. You get access to any verse in the Bible, in full context, almost instantaneously. It saves hours!

Type in a word or phrase, and all matching verses appear immediately. And if you're working on a concept—obedience, for instance—the exclusive Thesaurus function finds all verses with the word obey, plus synonyms such as follow, mind, observe, keep, and more. *Verse Search* also compares verses in separate windows, so you can have multiple verses on-screen. And it supports all popular printers and creates ASCII files for your word processor, too.

Scholars and ministers by the score praise this remarkable Bible aid. If you've been studying the Bible "by hand," you really owe it to yourself to try *Verse Search 5.0*. It will make an incredible difference in your work.

VerseSearch is fast! Enter a key word or two, and the full text appears almost instantly.

Language Assistants

Spanish, French, German, and Italian translations in a hurry.

Now you can communicate in French, German, Italian, and Spanish, even if you aren't fluent in the language. *The Language Assistants* translate your English documents for you, automatically or interactively.

These unique programs provide a host of memory-resident tools to aid you, even if you are unable to write in the selected language. You'll translate simple documents and individual words with the help of 40,000-entry bilingual dictionaries. Grammar Help Topics offer detailed explanations and examples as you work. There's even a special utility that adds accented characters to your word-processor documents—an important touch that your foreign contacts will appreciate.

Don't let language be a barrier. Once you've tried these articulate, bilingual programs, you'll wonder how you got along without their able assistance.

The Language Assistants take your original English text (left) and translate it nearly automatically (Spanish shown at right). It's fast, easy, and you have full control all the way.

The Evelyn Wood Dynamic Reader

The world's best reading-improvement method now comes to your PC.

Every day, the gap between what you can read and what you should read gets wider. Unfortunately, most of us still read at about 300 words per minute—only a 19th-century rate. *The Evelyn Wood Dynamic Reader*, however, can dramatically improve both speed and comprehension.

This new program successfully computerizes the world's best reading method. Reading Dynamics is not a skimming or "key word" method. Instead, it lets you register every word,

idea, and shade of meaning—while doubling or tripling your speed with 80-90% comprehension.

The Dynamic Reader lets you use more of your mental capacity and concentrate more fully. Since your PC is your tutor, you can work any time you want and at any pace, repeating exercises as needed. Your progress is recorded automatically, and colorful bar charts graphically track your improvement.

Dynamic Reader only \$39.95

Play It By Ear - Improve your ear with the leading note and interval recognition program.

Play It By Ear is the remarkable new ear training program that's perfect for musicians and music lovers alike. It teaches you to recognize notes, intervals, and chords by ear—and by location, using the onscreen piano keyboard or guitar fretboard. Choose melodic or harmonic exercises, including chord and interval naming, pitches, scales, modes, and more. You control the content and skill level, and you set the pace. *Play It By Ear* automatically identifies your strengths and weaknesses. And when you're stumped for an answer, *Play It By Ear* displays the correct chord, note, or interval. The program tracks your progress by graph, by exercise summary, and by printed report (perfect for schools).

Whether you're a two-finger piano puncher or a seasoned pro, *Play It By Ear* will sharpen your musical senses—and provide hours of fun.

NEW! The Elements of Style

The classic reference goes on-line! Now, better English is just a keystroke away.

Good news: the classic reference work on English style and usage—*The Elements of Style*—is now available on-line!

Based on the original work by Cornell professor, William Strunk Jr., and his student, the famous author and *New Yorker* essayist, E.B. White, this updated third edition is the best guide ever written for creating crisp, succinct, powerful

English. More than 170 articles provide concise, incisive commentary on usage and composition, as well as original, illuminating—even funny—discussions of form and style.

On-line, *The Elements of Style* is even better than it is in paper because you get the fastest possible access to any topic. Just scroll through categories and topics on-screen, then bring up the full text of any article, or print it out for reference. And you can locate topics in a flash. (To learn about pronouns, just type "pronouns," and you're referred to "Proper Use of Pronoun Case" and eight related articles.)

The Elements of Style is essential for effective communication—whether you're in business, a student, or a professional writer. Try it! You'll work faster and better when answers to your style and usage questions are just a couple of keystrokes away.

The Elements of Style only \$59.00

NEW! Your Personal Trainer for the SAT

Breakthrough strategies for higher scores.

Boost your SAT scores with one-on-one assistance from *Your Personal Trainer for the SAT*. This remarkable program assesses your test-taking strengths and weaknesses and gives you a personal training schedule directed toward your individual needs. Customized instruction gives you strategies for handling every kind of question encountered on the S.A.T. exam. The program also shows you how to budget time, when to guess (and when not to guess), and how to guess intelligently.

Your training schedule includes activities from both the software and the study guide. After each test, you get six or seven training activities. When you're done with these you can take another assessment test and get a new training schedule based on the results. You can take up to six tests designed to help you achieve your best. *Personal Trainer* also gives you information on the SAT itself—how it is structured, scored, administered, and timed.

Achieve the highest score you possibly can. Get *Your Personal Trainer For The SAT*—and a jump on the competition.

NEW! How to Choose the Right College

Scan the country in minutes!

Finding the right college or university can be daunting. Usually it means poring through enormous reference guides—or worse, relying on hearsay. Now, with *How to Choose the Right College* you can use PC power to find colleges that meet your needs and interests—all in minutes!

With a database of over 4,450 two and four-year schools and 350+ majors, the program finds colleges based on 12 key questions—such as field of study, location, student body composition, and more. Your final lists can be sorted seven ways, and you can produce detailed reports on each college. Unique SAT/ACT score charts show where you fit in—a feature that will surprise you.

Irv Brechner, best-selling author of *The College Survival Kit* and *Career Finder* breaks new ground with this unique search program. Its exclusive "data-plus-advice" approach gives you advice, hints, and tips. It shows you how to use the database information to make the best possible decisions. Created with extensive input from parents, students, and guidance counselors, the program lets you play endless "what-if" scenarios. The program recalculates the matches after each answer, so you can see if one variable is disqualifying too many colleges.

When it's time to find a college, turn to *How to Choose the Right College*. It's absolutely superior to any other method of finding that perfect match.

The Random House Encyclopedia

The fastest facts you can find.

Now you can get easy access to global information without leaving your computer. *The Random House Encyclopedia* is perfect for business professionals, students, and family members.

You'll get quick access to all kinds of information: Geography, History, Philosophy, Religion, Mythology, Social Science, the Arts, Law and Government. This wealth of information is stored compactly on your hard disk, thanks to efficient compression algorithms that are part of the sophisticated software.

Each category is broken down into subcategories that contain more than 20,000 articles. You can scroll through the hierarchy by using the Outline view, which lists information in a tree structure. The Reverse Dictionary lets you search for information by entering a date, topic, phrase, or string of words.

The Random House Encyclopedia is a powerful tool that will change the way you learn. Try it, and you'll never go back to old-fashioned paper encyclopedias again. This is truly the modern way to access information.

FloorPlan's simple, intuitive interface gets your design ideas down on paper quickly and easily. You can render everything from room arrangements to entire houses.

FloorPlan - Professional drafting without formal training.

It's tough to know how your home addition, office plan, or garden will look if you don't have an accurate layout. And if you're going for a building permit, you must have accurate drawings. Now you can rely on *FloorPlan* to create fast, easy, accurate designs without expensive, hard-to-use CAD software or laborious hand drawing.

FloorPlan draws walls, lines, circles, dots, and polygons. It includes 40 pre-designed architectural elements: furniture, common appliances, doors, stairways, windows, and much more. And it moves, copies, erases, and rotates any object in your design quickly and easily, so changing and updating are easy.

Add text in four fonts and three sizes. Twelve scales (including metric), 12 fill patterns, pull-down menus, and optional mouse control make everything easy. Printed drawings always come out clean and professional-looking.

Save yourself headache and hassle when you design, remodel, or rearrange your home or office. *FloorPlan* gets it down on paper—fast.

FloorPlan only **\$49.95**

Business Plan

Your smart guide to stable growth and profits!

Personnel Policy

Create up-to-date policy manuals fast!

Personnel policy manuals aren't what they used to be. Today, sensitive issues such as sexual harassment, smoking, and substance abuse are as vitally important as equal opportunity, benefits, employment policy, expenses, and compensation. How do you know what's legal—and what isn't—without spending months of time and thousands of dollars? Just order *Personnel Policy*. In minutes you can create manuals that cover employer-employee laws in simple, straightforward, easily-understood language. *Personnel Policy* includes more than 40 policies, each with a clear summary of purpose, related laws and regulations, alternatives, and pitfalls to avoid.

The Standard version provides all policies in ASCII format, ready for your word processor. The Stand-Alone version adds word processing software that lets you quickly locate appropriate policies on the data disk. With either version, you simply load the text you want and customize it for your own company. It's the fast, affordable way to create legally solid, up-to-date, personnel policy manuals.

Employment Policy

Equal Opportunity Policy
 • Recruitment • Employee Selection Process • Sexual Harassment
 Medical Evaluations and Interviews
 Substance Abuse • Smoking Policy
 Employee Classifications • Anniversary Date and Reinstatement
 • New Hire, Rehire, Relatives, Return to Work After Serious Injury or Illness • Corrective Counseling and Performance Improvement
 • Terminations

Compensation

 • Jury Duty • Voting • Pension, Profit Sharing, and Retirement Plans

Employee Expenses

Employee Incurred Expenses and Reimbursement • Mileage Reimbursement • Travel Reimbursement
 • Use of Rental Car on Company Business • Conferences and Meetings • Professional Memberships • Relocation of Current or New Employees • Temporary Assignment Allowance • Educational Assistance • Required Management Approval

Writing a solid, professional-looking business plan from scratch used to be a very complicated and time-consuming chore. Now *Business Plan* software revolutionizes the process with built-in templates that let you easily handle "financials" for ventures both old and new.

Business Plan comes in two versions. Use the Standard version with your own Lotus 1-2-3 software. Or choose the Stand Alone version and enjoy its built-in, interactive spreadsheet and word-processing software. It's the fast way to a professional plan, ready for associates and backers.

Both versions give you powerful spreadsheet files for financial analysis and graphing. They project cash flow, income statements, balance sheets, sales, and financial ratios. An included workbook, written by noted financial planning experts, takes you through each step it takes to set up a new business, expand an existing one, launch new products, do funding presentations, and much more. You get solid advice in building a management team, accessing your market, determining capital needs, and the do's and don'ts of raising capital and attracting investors and top-notch employees.

Customizable for service, manufacturing, retail, and distribution-related businesses, *Business Plan* uses concise, nontechnical language to guide you through

each step. It helps clarify goals, identify strengths and weaknesses, and sets you on the road to higher profits and stable growth.

With all these powerful tools at your fingertips, planning a winning business strategy has never been easier. Order *Business Plan* today, and make sure your company seizes every opportunity.

NEW! GeoWorks Ensemble - With its powerful multi-tasking, low system requirements, and stunning visuals, this new windowing environment is taking the nation by storm.

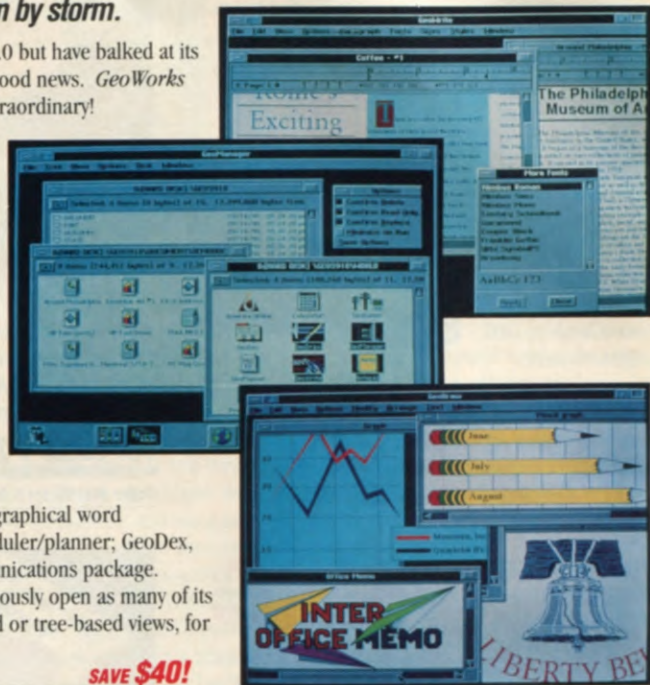

If you've looked longingly at Windows 3.0 but have balked at its high hardware costs, we have some very good news. *GeoWorks Ensemble* is here—and it's absolutely extraordinary!

GeoWorks' windows-based operating environment gives you everything that's good about Windows 3.0, yet—unlike Windows—it runs on almost any kind of PC. You get a gorgeous, easy-to-use, graphical interface, true multitasking of the included suite of applications, plus the ability to easily launch your current DOS applications. Most importantly, all this power runs crisply

on any system, from early XT's with 512K of memory to the fastest 386-based machines with megabytes to burn.

Along with the GeoWorks environment, you also get Ensemble: five elegantly designed applications bundled with it. Ensemble includes GeoWrite, a slick, WYSIWYG graphical word processor; GeoDraw, a powerful color drawing package; GeoPlanner, an excellent scheduler/planner; GeoDex, a graphical card file/index for names, with autodialer; and GeoComm, a neat telecommunications package.

GeoWorks launches any application when you click on an icon. It lets you simultaneously open as many of its own applications as memory allows. And it lets you manage files using either icon-based or tree-based views, for maximum flexibility. GeoWorks has more software prizes than Kevin Costner has Oscars—and it's easy to see why. Try GeoWorks risk-free on our 30-day guarantee. We think you'll agree: it's a wonderful achievement in software design. You'll love using it!

GeoWorks Ensemble combines a beautiful windowing environment with easy file management and solid software packages like GeoWrite, GeoDraw, GeoDex, and more. It's perfect for pros and novices alike.

Clarion Personal Developer

Quickly create your own custom programs, even if you're not a programmer.

Now you can create your own custom programs—complete with pop-up windows, scrollable tables, point-and-shoot menus, on-line help, and printed reports—even if you don't know the first thing about programming.

Clarion Personal Developer is a brand new kind of "software for writing software"—all without programming.

It takes you step-by-step from an idea to a complete working program.

To make it even easier, *Clarion Personal Developer* comes with eight complete programs: an order entry system, a membership manager, a sales lead tracker, a phone manager, a memo writer, a teacher's organizer, a library cataloging program, and a personal assets inventory program. Use these programs "out of the box," customize them, or use them as patterns for other programs. You also get a free subscription to the Desktop Solutions Club newsletter, plus six free new productivity applications worth \$60.

Clarion Personal Developer fills a tremendous need in personal computing. Order now and find out how great it can be to create—quickly and easily—and use software exactly suited to your needs.

Clarion Personal Developer only **\$79.00**

Order #H2483 (includes both 5.25" & 3.5" disks).

Published by Clarion Software. Requires 512K of memory and a hard disk (uses about 2MB).

ZIPHONE*1

Here's the fast, easy way to locate and enter zip codes, cities, and area codes.

*ZIPHONE*1* finds and corrects city names, state abbreviations, and zip codes quickly and accurately, then pastes them into other software applications. Just pop up the memory-resident window, enter a customer's zip code, and the program displays the correct city, state, zip, and area code. Then it optionally pastes the information into your current application. If you know the phone number, or area code and prefix, type it in, and the city, state, and zip code appear. Or key-in the city name, and *ZIPHONE*1* gives you the state and zip.

*ZIPHONE*1* runs stand-alone or in memory-resident mode for instant access within other software. And now *ZIPHONE*1* gives you batch-mode processing, so you can correct entire mailing lists automatically. The program corrects misspelled cities and states and replaces bad zip codes—all based on the latest U.S. Postal Service information. This means more deliverable mail, less returned mail, reduced printing costs—and more money in your pocket.

If you work with phone and mailing lists, get *ZIPHONE*1*. It will pay for itself right out of the box.

Just pop up the window, find your missing data, and paste it into your underlying application.

ZIPHONE*1

only **\$49.95**

Order #H3632 for 5.25" disk, or #H3631 for 3.5" disk.

NEW! MergeMaster

Finally: an easy way to merge database information with word processor documents—automatically!

Now you can create personalized mailings, billing statements, and reports without rekeying names and addresses.

New MergeMaster combines the power of your database program with the power of your word processor to give you new capabilities.

Merging is easy when MergeMaster pulls in database fields containing the data you need and creates a word processing merge file. You then merge data with text right in your word processing software using commands you already know. MergeMaster even helps you select records to target any database cross-section.

MergeMaster works with dBASE, Paradox, and all their compatibles, including FoxBase+ and Clipper. It works with WordPerfect 4.2, 5.0, and 5.1; Microsoft Word (comma and tab formats); Wordstar 3.0 and up; Xywrite III; Volkswriter 3; IBM Displaywrite; plus ASCII formats.

Tap the full power of your database by linking it to your word processing software—with MergeMaster.

MergeMaster only **\$79.95**

MergeMaster's easy interface makes it simple to set up personalized mailings and reports.

The Typewriter

Turn your computer into an electric typewriter whenever you want.

Using your computer to type an envelope or fill out a preprinted form is usually more trouble than it's worth. That's why most of us still keep a regular typewriter on hand—or resort to handwriting.

Now there's *The Typewriter*. It makes your computer the most practical machine for typing those "quickies" that don't need to be saved in a file: envelopes, memos, mailing labels, short letters, and the like.

Simply boot up and type as you would on a regular typewriter. Right on-screen you'll see what you've typed. Set *The Typewriter* to print character-by-character, so you see each character's location as you type. Or set it to print line-by-line, so you can catch and correct errors before they're printed.

Just like a regular typewriter, *The Typewriter* lets you set margins, tabs, and line lengths. And when you're working in line-by-line mode, a handy word-wrap feature automatically sends words exceeding the right-hand margin over to the next line.

Don't pull out the old Remington or settle for "handwritten" to get the small jobs off your desk. Try *The Typewriter* instead.

NEW! BigMouth

Versatile voice mail and call processing system puts big-company phone capabilities in your PC.

Are you tired of playing phone tag? Did the receptionist get your message wrong? Do you wish you had a 24-hour receptionist? Would profits increase if you could take orders 24 hours a day? Have you had it up to here with your answering service? If the answer to any of these questions is "yes," you're ready for *BigMouth*.

BigMouth is a state-of-the-art voice mail system that works like a full-time receptionist—all with perfect accuracy.

Just install the half-slot card, hook up your phone, a phone line, and the included speaker, and you're ready to go. *BigMouth* provides a centralized message retrieval system that works with all touch-tone phone systems. It provides private message taking and forwarding, remote retrieval, order-taking, call distribution, autodialing, outbound telemarketing, and more. You can use it to automatically place calls and take polls and surveys, set up voice bulletin boards and dispense information 24 hours a day. It can even call you at home if your company security alarm is tripped.

The outbound telemarketing function dials from a list of up to 300 phone numbers. When it hears a voice, it will play your message to potential customers or staffers. You also get a phonebook-database that lets you set up listings by function, vendor, customer, client—anything. The autodialer lets you place a call with a single keystroke.

BigMouth efficiently processes all your inbound and outbound calls.

Try it and you'll see: it will revolutionize the way you do business!

Big Mouth takes and relays messages, writes orders, reads scripts, and more. And it saves you thousands of dollars over the cost of a new phone system!

Published by Reference Software International, Digital Learning, WordScience Corporation, and Nova Development Corporation.

Effective business communications must be professional and persuasive. *The Writer's Pack*, featuring Grammatik IV, provides a complete set of tools for effective business writing. Just choose the tools you need, and watch the challenges of format, style, content, vocabulary, and grammar fall by the wayside. Each tool works from within your word processor for complete help on everything from concepts to commas.

Here's what you get:

- **Grammatik IV.** The #1 style and grammar checker, it proofreads for thousands of errors in grammar, style, usage, punctuation, and spelling.
- **The Associated Press Stylebook.** The accepted standard for professional usage and style, including business and computer terms.
- **Definitions Plus!** The acclaimed electronic version of The American Heritage Dictionary offers multiple definitions of over 115,000 words.
- **Keynotes Writer's Handbook.** On-line reference to everything from punctuation to quotations to citations—with simple access.
- **American Handbook of Business Letters.** Hundreds of instant business letters for every occasion. Just select, edit, and print!

With all this power at your fingertips, you'll write better than ever before. And our bargain price makes it power that's easy to get!

NEW VERSION! ScreenExtender Get the BIG picture for WordPerfect!

ScreenExtender 2.0 extends the WordPerfect screen from 25 rows by 80 columns to as much as 60 rows by 133 columns. It supports super VGA and gas plasma screens, it's fast and readable, and it even lets you select screen colors.

Every WordPerfect command is fully functional in every screen size. And, as our sample screen shows, you actually see text underlined, boldfaced, small caps, subscript or super-script as you work. With 13 screen sizes available for super VGA, twenty for VGA, EGA, and gas plasma displays, eight for CGA, and twenty-five for Hercules graphics, you'll wonder how you ever worked without ScreenExtender. Try it!

NEW VERSION! Smart Label Printer Plus

The remarkable personal printer from Seiko.

Printing small labels can be a real challenge. Rather than face the irksome task of inserting single labels into your printer (vainly hoping they'll print accurately), you end up filling them out by hand or fussing with a typewriter.

Now there's a smarter, more convenient way to get the job done. *Smart Label Printer Plus* is Seiko's clever printer that fills out labels one at a time for dozens of uses. It's so light and compact, you can use it at home and in the office. And now it provides a wealth of new fonts, plus label previewing for maximum flexibility.

It even prints bar codes, line characters, and other special fonts.

New Smart Label Printer Plus gives you easy font control—plus a fast label preview to check fit.

At the touch of a button, Smart Label Printer Plus prints just about any label you need: file folder and disk labels, mailing labels, bar code labels, video cassette labels, and more. It's especially handy when you need to produce labels in a hurry for last-minute mailings. Simply connect to your serial port with the cables provided, and install the easy-to-use software. You even get a roll of labels to start you off.

No matter what text-based application you're in—word processor, database, spreadsheet—just pop up a window, highlight the text you want, and edit it if you like. Then push a button and your label is printed—quietly and in crisp, high-contrast characters. Your regular printer operates just as before, without interruption. And maintaining your Smart Label Printer Plus is easy, too. Because there are no ribbons or cartridges to replace, print is consistently sharp, no matter how many times you use it.

When you need labels, Smart Label Printer Plus is the fast, fuss-free solution.

Smart Label Printer Plus

only **\$249.95**

Includes two rolls at 130 labels per roll.

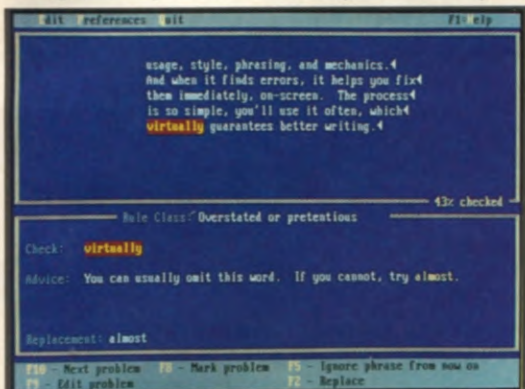

start to finish!

Grammatik IV, Version 2.0

The intelligent style checker that helps you write better—right now!

Grammatik IV is the most powerful, most professional writing aid on the market today. It's the easiest to use. And with new Version 2.0, it's even better than ever.

Working within your word processor, Grammatik IV proofreads each sentence, then compares each word against a complete collection of writing rules. It finds errors in grammar, style, usage, punctuation, and spelling. Then it helps you fix them immediately—on screen. The process is so simple, you'll use it often, which virtually guarantees better writing. And the process is so effective, you'll soon find you're writing better.

You can choose from six writing styles: Business, Technical, Fiction, General, Informal, and Custom. The program compares your business writing with a standard insurance policy—and your creative prose with writings of Hemingway and Lincoln. Add your own comparison documents, and standardize your company communications.

The Grammar Help Dictionary gives you in-depth information on grammar and style, and explains writing problems clearly and simply. A bonus book, *Secrets of Successful Writing*, comes free when you register.

Grammatik IV, Version 2.0 now works by hotkey within WordPerfect 5.0/5.1, Microsoft Word 5.0/5.5, WordStar 5.0/6.0, Professional Write 2.1, and others. It supports the MS Word and WordPerfect user dictionaries, and works directly on files created by 35 different word processors. It also includes hundreds of new rules, faster spell checking, and mouse support.

With Grammatik IV, your writing will become clearer, more concise, and more persuasive from the first day you use it.

Word For Word Professional

At last! Fast, easy word-processor file exchange.

Converting files from one word processor format to another can be awfully important—and awfully difficult. Now you can use *Word For Word Professional* and transfer files with all attributes intact.

Word For Word Professional supports more than 30 popular word processors. Just select "source" and "target" formats, and let it do the rest. Margins, tabs, indents, boldface, underlining, superscript, subscript, columns, footers, headers, centering, footnotes, and more—all translate perfectly. It even converts Lotus files with all columns and formatting intact. And it's fast—less than a minute for a 25-page document.

And the super-fast, optional batch mode converts up to 200 files at once.

If need an easy way to exchange text between different word processors, you've simply got to try *Word For Word Professional*.

NEW! Collect-A-Debt

How much money are you lending your customers? Save money—while you collect it!

Now there's a cost-effective alternative to pricey collection companies: new *Collect-a-Debt* saves you money by handling collections on your own PC.

You get five standard collection letters, and you can add all the letters to the system you like, using the built-in word processor—or your own. Letters can be as tough or as gentle as you like, and you set the sequence in which they are mailed. Each day, your PC searches for clients who are due a letter. All the relevant details are automatically merged into the letters and printed on your own letterhead or plain paper.

You don't have to worry about tracking dates or client history, either. A calendar and tickler system remembers all details and prompts your next action. And you get a history of all contacts.

Stop lending money to your customers and clients, and stop making collection agencies rich. Buy *Collect-A-Debt* instead—and find out how easy it is to generate extra cash flow. Try it today!

Financial Ratios II

A complete financial statement analysis in minutes.

Take the mystery out of financial statement analysis with *Financial Ratios II*. Just enter your data on the left side of the screen, and ratios are instantly computed on the right. Enter your SIC code, and compare your ratios with other companies in your industry from the built-in database of 100 Industry Standard Ratios derived from U.S. Government data. Save your ratios for comparison with future financial statements—or with your competition.

The built-in database can be modified or loaded with up-to-the-minute data obtained from any external source, such as information purchased from Robert Morris Associates or Dun & Bradstreet. And every entry and computation is backed up by its own unique context-sensitive help screen, a major plus for beginners new to ratio analysis.

Believe us, even the most tight-lipped money lender will be impressed once your financial statement has been fine-tuned with *Financial Ratios II*.

NEW! OCC Fixed Assets 3.0 - Automate your depreciation calculations—and save hours on reports.

With our new *OCC Fixed Assets 3.0* depreciation program you'll save hours in manual calculations and report preparation. Not only does OCC Fixed Assets give you up to 34 depreciation methods, but you can use it to process an unlimited number of companies, each with separate reports. The program even automatically determines whether the Mid-Quarter Convention applies and adjusts year-to-date depreciation in the fiscal year's last quarter.

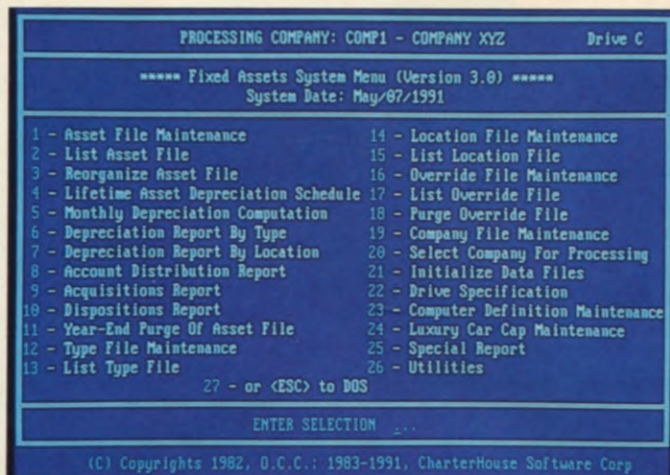

Up to 32,000 assets per company can be entered, and for each asset the depreciation method, life, and salvage value can be set up differently for book, federal, state, and two other types of side-by-side reporting—including AMT. For each method, the screen shows the current period, year-to-date, and accumulated depreciation. And seven information-packed reports make fixed-asset analysis easy.

Let OCC Fixed Assets automate your asset accounting, and save yourself hundreds of hours of headaches.

Our books in order!

NEW!

Pacioli 2000 Accounting

Low-cost, high-performance, network ready accounting is here!

Don't pay hundreds of dollars per module for accounting software. Get *Pacioli 2000 Accounting* instead. It provides all key modules in a single package. And there's no trade-off in power or performance.

You get eight fully integrated modules, including General Ledger, Accounts Payable and Receivable, Inventory Control, Purchasing, Billing, Budgeting, and Auditing.

You also get flexibility. *Pacioli 2000 Accounting* lets you choose among four accounting methods: Cash basis, Accrual basis, Service based, or Inventory based. You can switch methods at any time without re-configuring files or losing data.

Pacioli 2000 lets you automatically duplicate the file structure from one company to another by copying master files. You can maintain up to 999 companies on-line at the same time from a single installation. If your needs are greater, simply reinstall the program in another subdirectory—and get 999 more.

The unique multi-module/single-system design of *Pacioli 2000 Accounting* pays you big dividends. First of all, you can use the full power of the program without switching from module to module. Each is fully integrated into the system, making it as easy to use as a checkwriter. When you enter a transaction, every related module is immediately updated. For example, when you buy inventory, the program automatically enters vendor data on the purchase order, calculates discounts and due dates, adjusts inventory (including back-orders), updates vendor files, and prepares data for payment by check.

While other packages lose detail information when posting data, *Pacioli 2000 Accounting* maintains details of all transactions for up to 36 monthly accounting periods—simultaneously. Keeping multiple accounting periods open at once improves the audit trail and lets you make transaction inquiries easily. And

entering transactions for a new year before closing the previous year increases your control.

Also included are prepared reports and options that provide valuable data for your business: Accounts Activity, Receivable/Payable, Balance sheet, Income Statement, Working Capital, Analysis, and more. No other accounting package exports data with as many sorting and selecting options and you can display reports on-screen, print them, or export to your word processor.

If you order now, you'll get certificates redeemable for a Payroll module and a 2-hour training video that introduces you to *Pacioli 2000, Basic Accounting*, and MS-DOS. They're both free when you register your software (all you do is pay \$7.50 shipping).

We give *Pacioli Accounting* our highest recommendation. Try it, and you'll quickly find out why!

Supporting your business

Trumpet Plus

Fast professional graphic presentations!

Trumpet Plus creates professional text and graphic presentations in a flash. If you can write a memo, you can use Trumpet Plus to create overheads, paper handouts, and presentation-quality exhibits—in up to 16 colors.

Trumpet Plus provides preformatted templates, plus a wide selection of typefaces and sizes. Automatic features create titles, subtitles, footnotes, paragraphs, bullet lists, outlines, org charts, text and numeric tables, and more. You can create graphs just by entering the data you want to see. Trumpet Plus automatically creates 3-D bar graphs, line charts, bar charts, high-low-close charts, area charts, and pie charts.

Trumpet Plus also gives you a clear overview of your presentation. Its automatic table of contents is your guide to revising and reorganizing your presentation. You can even edit two presentations at the same time.

If you want quality business presentations—text or graphic—give Trumpet Plus a try. It delivers true value in an economical package.

is our business!

NEW! More than 500 business forms ready to go—plus the power to make, find, and fill them.

FormWorx for Windows

Designing forms is time-consuming and tedious, and filling them out can be incredibly inefficient. But with our new *FormWorx for Windows*, you can create professional, typeset-quality forms in minutes—plus fill them out by the dozen as fast as you can type.

It's easy! Use one of the 550 forms supplied with the program—"as-is" or customized—or create your own from scratch. You get professionally designed forms for general business, personnel, project planning, time management, sales and marketing, federal government, department of defense, industry, and more.

Creating your own forms is simple: pull-down menus, mouse control, and predefined building blocks (objects) make it fast and easy. WYSIWYG technology lets you see on the screen exactly what will come out of your printer. This object-oriented design saves immensely on disk space. And FormWorx for Windows works with all third-party soft fonts so you can add typesyles at will.

But that's not the whole story. FormWorx brings *Fill & File* technology to the Windows world. With your form on-screen, just tab from field to field, entering data as you go. You can also set up any field to look up and enter information from a database—so entering a part number will simultaneously fill in the correct part description and its price, for example. Powerful validation features automatically compare entries to lists of possible valid entries, and preset automatic math functions handle everything from addition and subtraction through trigonometric functions.

Order time-saving FormWorx for Windows today—and give your business the professional edge in forms design and filling.

FormWorx for Windows **SAVE \$100!**

WILL BE \$299.95 **INTRODUCTORY PRICE \$199.95**
Order #3000H for 5.25" disks, or #3000F for 3.5" disks.

Requires Microsoft Windows version 2.0 or higher; 640K of memory; hard disk; mouse; VGA, EGA, CGA, Hercules, or compatible graphics.

WYSIWYG forms layout and form filling are yours at last! Object-oriented form design lets you build forms fast using large building blocks instead of individual lines. To fill out a form, just tab from field to field and enter data.

The MousePen Professional

All-new design makes this breakthrough input device even better than before.

Here's the second generation of Appoint's revolutionary pen-shaped pointing and drawing device. With improved ergonomics, more refined operation, and a lower price, it's truly an extraordinary package.

The sleek new round design makes *The MousePen Professional* feel like a fine writing instrument. The new $\frac{3}{8}$ " ball makes for a smoother feel, and new instantly selectable resolution lets you choose between 100 and 1,000 cpi (counts per inch). The MousePen Professional also operates on more surface textures and can be used at more extreme angles. Redesigned buttons make two-button presses easy, and the power draw is even less than before—great for laptops.

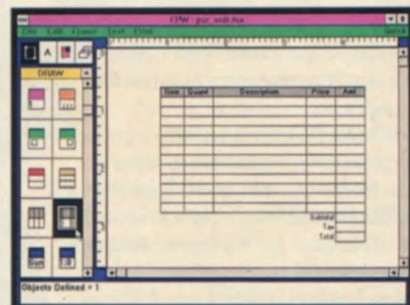

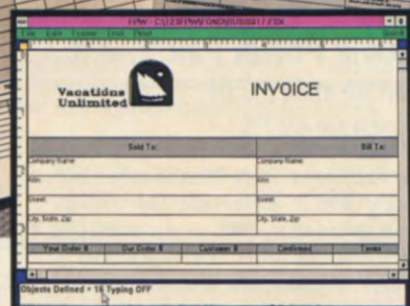

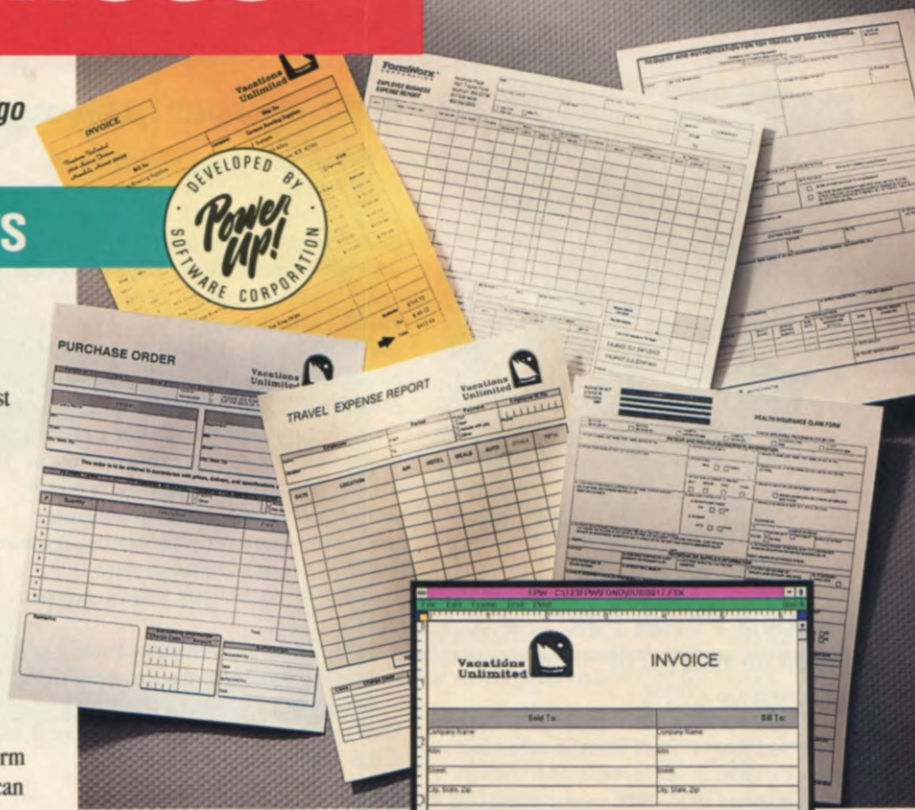

With great balance and feel, an attractive new look, and a wealth of new features, The MousePen Professional is an innovative and elegant solution for today's input device requirements. Try it. We think you'll love it.

The MousePen Professional **SAVE \$30!**

Essential utilities for tod

PC-Kwik Power Pak

Speed up your PC by as much as 400%.

Why wait for your PC to finish its tasks while you watch? With *PC-Kwik Power Pak*, you can give your system up to 400% greater speed. Acting on your disk drives, keyboard, screen, and printer, it's a recipe for total system speedup.

Power Pak includes the popular Super PC-Kwik Disk Accelerator, the fastest, most reliable cache program available. A major speed enhancer for all computers, from PCs to 386s, it can increase PC performance by two to four times—or more.

While Super PC-Kwik is available separately, the complete Power Pak adds four other essential timesavers. You get print spoolers, to help applications finish print jobs in seconds instead of minutes. An "intelligent" RAM disk borrows memory from the cache only when needed and returns it when done. A Screen Accelerator speeds up your screen by 2 to 6 times. And a dramatic Keyboard Accelerator lets you speed up your keyboard repeat rate for rapid text insertion.

If you're in a hurry to get the job done, PC-Kwik Power Pak is the way to do it. Winning rave reviews in all key computer publications, it's a complete recipe for turbo-charging every speed-limiting component of your PC.

PC-Kwik Power Pak only **\$129.95**

Bootcon - Select system configurations from your own custom menu.

Many programs require special system configurations to run properly—configurations you don't want to use with other programs. Memory-resident programs (TSRs) and device drivers often clash, require loading in special order, or refuse to release memory when loaded. To fix these problems, you must edit your CONFIG.SYS and AUTOEXEC.BAT files and reboot your system. It's very cumbersome, confusing and time consuming. *Bootcon* resolves all conflicts by displaying a menu of system configurations each time you boot or reboot your computer. Suddenly it's easy to change configurations, alter memory usage, select drivers, and more. For novices, *Bootcon* simplifies several of the most arcane DOS functions; for power users, it saves enormous time.

Our technical specialists love *Bootcon* and recommend it unreservedly—especially for our desktop publishing and graphics customers. Their only question is: why didn't anyone think of this simple, helpful idea before?

With *Bootcon*, setting up different system configurations is as simple as choosing from a menu. Gone are the arcane complexities of editing your CONFIG.SYS file or modifying your AUTOEXEC.BAT file.

Bootcon only **\$59.95**

Order #H2273 (includes both 5.25" & 3.5" disks)

Published by Modular Software. Requires DOS 3.10 or later.

Voice Master

Speed up your work: talk to your computer for faster response.

Now you can speed up data entry and streamline command input by adding up to 64 voice commands to your existing software programs. Perfect for CAD programs, desktop publishing, word processors,

spreadsheets, databases—even games—*Voice Master Key I* and *Voice Master Key II* create a whole new dimension in personal computing.

With *Voice Master* it's easy to train your computer to recognize a word or phrase and assign a series of keystrokes to it. You get near-instantaneous response with high recognition accuracy. *Voice Master* digitally records your own speech, sound, or even music. It lets you create software sound files, voice memos, and more. You can send voice mail through LANs or modems, provide computer speech response to your spoken commands—all from within your applications software. You can create prerecorded speech files so that the computer "speaks" to confirm your voice commands. And you can create different configuration files for different users.

Everything you need is included. *Voice Master Key* provides a microphone headset, half-slot card, software, and manual. *Voice Master Key II* works via your parallel port without requiring a card. All components are housed in a sturdy steel box with a built-in speaker, separate volume and tone controls, external speaker and headphone jacks, and external line-level inputs and outputs. Both *Voice Master* versions are compatible with talking software from IBM, Britannica, Davidson, Electronic Arts, Hyperglot, and many other publishers. Add the world of sound to your computer—with *Voice Master*!

Squish Plus

Double your disk capacity with this dynamic data compressor.

Here's the easy way to make a 40-megabyte hard disk hold 80 megabytes of data, and get 1.4 megabytes of information onto a 720K floppy. It's called *Squish Plus*, and it's the best data compressor we've ever seen.

Unlike archive programs, Squish Plus is completely automatic and completely invisible in day-to-day operation. Your software works just the same as before. All word processors, databases, spreadsheets, utilities—anything—work fine with Squish Plus. Files are automatically compressed every time you save a file from any program. And they're automatically "decompressed" when you load them. Operation is quick, too. You'll notice no performance slowdown. Optional password protection is built in, so you get an added measure of security when you "squish" your data.

Squish Plus is a great idea in software. It's the fastest, simplest, most cost-efficient way to upgrade your disk storage capacity. Thousands of our customers are using Squish Plus every day. If you're not among them, give it a try. You'll be glad you did!

NEW! Quick Template

Your instant, on-line, function-key reference guide.

When you're learning a new application—and when you're working with multiple software programs—it's very easy to forget which function and control keys do what. That's why *Quick Template* is so useful.

Memory resident, Quick Template is always there when you need it. Just hit the hot key and Quick Template instantly displays a reference menu in a pop-up window. At a glance you get the exact command for every function key—without interrupting your work or taking your eyes off the screen. Quick Template even recognizes the program you're running and automatically displays the correct menu. You don't do a thing to prompt it. In WordPerfect, you get all the WordPerfect function key commands. Switch to Lotus 1-2-3, hit the hot key, and you get Lotus commands instantly. It's that fast and simple.

Quick Template provides menus for popular applications from dBase to Microsoft Word to Lotus 1-2-3 to Calendar Creator Plus, and many more. It even lets you create your own custom menus for new software and modify existing templates when you've written your own macros.

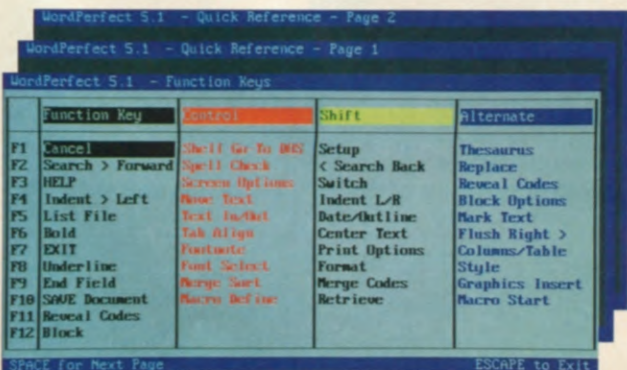

Why waste time checking manuals or fussing with cardboard templates? Quick Template keeps all the information you need right at your fingertips.

Get Quick Template, and give yourself the gift of speed.

The C Workshop

Learn today's most versatile, powerful programming language.

The C programming language produces powerful compact programs. In fact, many of today's best-known commercial software programs are written in C. If you'd like to learn this elegant programming language, try *The C Workshop*. Everything you need to learn C is right here—from fundamentals to advanced concepts. You'll learn to write your own programs in C, using completely interactive, self-paced methods and a coordinated, comprehensive textbook loaded with instructive quizzes.

A memory-resident editor and high-speed compiler help you complete over 80 program exercises—and experiment on your own. As you display a

program, you can compile and execute it on the spot for instant feedback and error-checking.

A test module checks your work, reports whether your programs give correct results, and helps correct errors. The compiler also creates small stand-alone programs and is compatible with all popular C packages.

Because of its unique combination of interactive print and software technology—and its dynamite compiler, we give *The C Workshop* our highest recommendation. Try it, and you will too!

Name That Disk

Finally! A simple, goofproof way to create neat, annotated floppy diskette labels.

Ah, the wonders of the personal computer—until it's time to label the diskette. Or find an important file in a stack of unidentified diskettes. Or access a complete listing of all data pertaining to particular diskette files.

Until now, labeling a diskette forced us to return to "manual"—to labeling and relabeling by hand, and to time-wasting, frustrating searches for important information. At least, that's how it used to be.

Now, *Name That Disk* produces professional-looking, error-free, detailed labels automatically. Just insert a diskette into any drive, let Name That Disk read it, and relax, as you watch Name That Disk print a perfect label in either 5 1/4" or 3 1/2" diskette format.

For either size label, you can choose from three graphic formats: *multicolumn*, which shows up to 36 files per label; *single column*, which lets you add comments after file names; and *single dated column*, which lists file creation dates, times, and your own detailed comments.

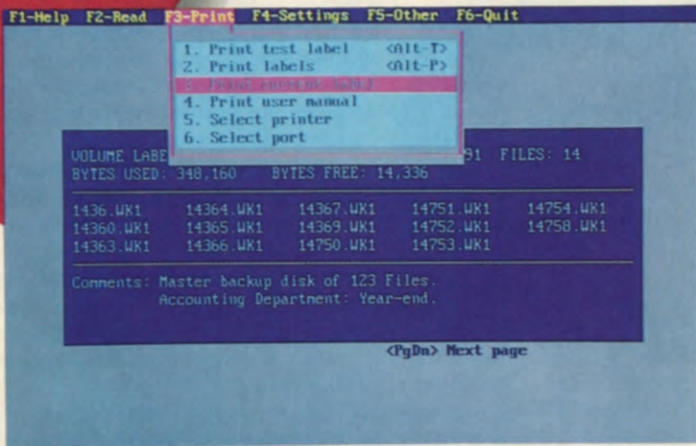

Each label includes a title, volume name, filenames (sorted by name, date, or extension), disk space used, disk space remaining, and label creation date. For hard disk backups, Name That Disk even prints

sequentially numbered labels for you.

Name That Disk also displays an image of the label that's about to be printed, so you can add comments for any file and give your diskette a special title. It prints up to 35 directory/file names for 5 1/4" diskettes and 36 for 3 1/2" diskettes. And if you have more files, it prints as many labels as you need. Additional labels are marked with a special note ("Label 2 of 4," for example). Order Name That Disk in either the 5 1/4" version, which comes complete with 100 4" by 1 7/16" removable, soft-stick labels; or the 3 1/2" version, which provides 50 2 3/4" square labels. Each version handles both diskette sizes. Straighten up and file right—with Name That Disk.

- Prints accurate, detailed disk labels in three graphic formats
- Sorts files by name, date, or extension
- Lets you sort, edit, and add comments, too
- Comes complete with soft-stick diskette labels

Name That Disk only \$39.95

Order #2139H for 5.25" disk, or #2139F for 3.5" disk.

Supports IBM Graphics and Proprinter; Epson (all dot-matrix models); Okidata 84, 92, 93, 182, 192, 193, 292; C. Itoh Prowriter; Apple Imagewriter II; Diablo 635; IDS 460, 560, Prism; Dataproducts 8050; NEC P5, P6, P7, 8023; Tandy DMP; Toshiba P321, P351. Not compatible with laser printers.

Additional Soft-Stick Diskette Labels

SIZE	QTY	ITEM #	PRICE
5.25"	200	I1400	\$9.95
3.5"	100	I1480	\$9.95

What could be simpler? Just insert a disk, let Name That Disk read it, then watch it print a perfect label — instantly and automatically.

The Program Director

Press a key, and select any hard-disk program from your own custom menus.

Now, with *The Program Director*, you can start all your software applications the easy, convenient way—from menus. Imagine how relieved you'll feel once you realize that you'll never have to key-in obscure pathnames or lengthy commands again.

Setting up *The Program Director* couldn't be easier: simply assign each hard disk program's path and start commands to a menu number. That's the last time you'll need to enter a start command—ever! And *The Program Director* handles up to twelve separate commands for each selection on any menu.

With custom-titled menus nesting up to two deep, you can access as many as 256 programs. Three levels of optional password protection control your access to programs and functions. To run a program, just type its number, press Enter, and watch the program appear. When you exit a program, the menu automatically returns to the screen.

If you should need to use DOS commands such as DIR or COPY, simply send them from within *The Program Director*.

Getting an application started shouldn't be a hassle, and it needn't be with *The Program Director*. Give it a try! It's the easy way to get your programs up and running.

The Program Director only **\$59.95**

Order #I233Y for 5.25" disk, or #I730Y for 3.5" disk.

Requires a hard disk.

*Just type a number, and *The Program Director* launches your program of choice. When you exit your application, the menu reappears, ready for another command. You can create menus for up to 256 programs.*

NEW! XTree Easy

Perform all DOS functions and manage your files from simple pull-down menus.

Have you ever had trouble remembering a DOS command or keeping commands like CD and RD straight? Or spent time and frustration hunting for a file that ended up in the wrong subdirectory?

If so, *XTree Easy* will be a welcome relief from all those time-consuming "must-be-letter-perfect" DOS commands. It puts an easy-to-use, transparent interface between you and your operating system that streamlines all your menuing and file management tasks. By using a straightforward graphical representation of your disk's directory structure, *XTree Easy* lets you see what you're doing while you're doing it.

First you simply identify your file or group of files by moving the highlight bar, then you select the Move, Copy, Delete, Rename, or other DOS commands easily from pull-down menus or with *XTree Easy* key commands. You can also create, change and remove entire directories in a fraction of the time it takes in DOS—all without ever typing a word.

Want to create a new file, browse or edit a text file while in *XTree Easy*? No problem. The built-in Text Viewer and Editor make it effortless. Best of all *XTree* prompts you every step of the way. And if you have questions, you can consult its complete on-screen context-sensitive Help for explanations. Plus, *XTree Easy* creates a custom program menu for all your applications, automatically, so when you turn on your computer you see a menu of all your applications. To start any one of them from the program menu takes a single keystroke or a click of your mouse. You can even open a specific file within any application by just pointing and clicking.

The simplest, most logical solution to managing your files, *XTree Easy* will save you time—and you may never deal with a DOS path name sequence again!

XTree Easy's simple, logical screen gives you a picture of your disk organization—a picture that comes to life as you work with your files.

CALL 7 AM-5PM Pacific Time, M-F

When you want to show off the order in your organization, this is the only way to do it.

Company Ladder

The most professional way to represent your organization is also one of the fastest and easiest to use. With *Company Ladder*, you can create org charts and other tree-based diagrams in virtually any size—and with presentation-quality printouts matching the highest corporate standards.

Simply type in names, titles, salaries, comments, and more. *Company Ladder* draws perfect boxes and connecting lines, spaces the boxes automatically, and positions text exactly. And, when it comes time to print, you'll be amazed at the professional, presentation-quality output—whatever your printer.

On lasers, *Company Ladder* uses your 10 and 14-point Helvetica and Times Roman fonts, portrait or landscape, plus Courier and line printer fonts. Boldface, italics, and underlining are all supported at full 300-dpi resolution. And *Company Ladder* provides super-sharp dot matrix output, too.

Creates pro-quality org chart and tree diagrams

Fast, flexible operation makes last-minute changes simple

Tallies salaries, budgets, and other numbers

High-resolution fonts provide presentation-quality output

Keeps all your org charts up to date

Editing couldn't be simpler. You can insert, delete, and move positions individually, by range, or even by department. Lines, boxes, and spacing are automatically updated with each change. Chart height, width, number of levels, and people per level are unlimited because *Company Ladder* accepts more than 2,000 employees per chart.

There are seven chart and six box styles, and you add auxiliary lines to show dual reporting relationships. The program shows departmental budgets on any chart. And it handles counting, sums, averages, and more. You can add numeric data on any line. Wide charts print sideways, and for charts that won't print on one page, the program prints multiple pages with overlaps for later paste-up.

Whatever your tree-based diagram needs, if you want to present them like the pros, *Company Ladder* will help you do it—fast, easily, and with a truly professional standard of quality.

Form Finisher 2.0

The easy way to fill out preprinted forms.

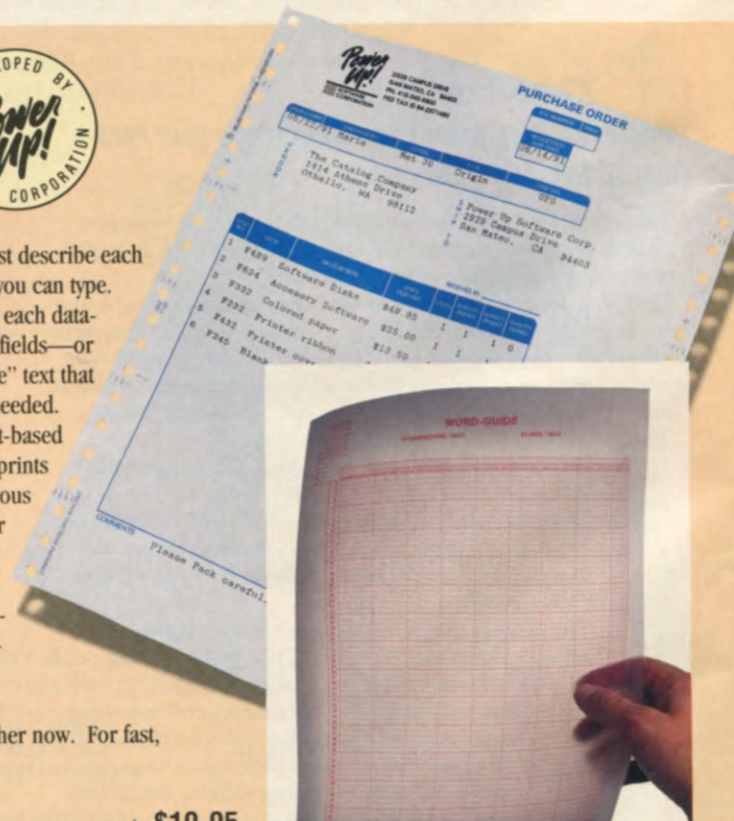

Form Finisher makes light work of filling out forms on your printer. Just describe each form to *Form Finisher* once, and you can fill it out by the dozen, as fast as you can type.

In a one-time operation, you indicate the name, length, and location for each data-entry field. (*Form Finisher* prints a grid on your form to help you find the fields—or you can use our Word Guide.) Specify text alignment, plus any "boilerplate" text that you want printed automatically on every form. Specify math operators, if needed.

On-screen, each field name is labeled in your choice of WYSIWYG or list-based views. Just enter data, and *Form Finisher* performs any calculations, then prints your completed forms perfectly. You can duplicate any entry from a previous form with just a keystroke. And you can store completed forms on disk for batch printing or later editing.

Your filled-out forms are stored in dBASE IV format, so they're easy to retrieve by scanning through a file. You can set up your forms to automatically pull in data from other files. *Form Finisher* works with any vertically-oriented form your printer can handle—up to 14" by 14". It supports standard text-printing modes and nearly all printers.

If you're tired of filling out forms the old-fashioned way, try *Form Finisher* now. For fast, error-free forms, it's the perfect choice.

**From creation to completion,
this is your complete forms solution.**

FormWorx with Fill & File

Make any business form quickly and easily, then fill it out instantly, using *FormWorx with Fill & File*. Invoices, expense reports, tracking sheets, records, order forms, calendars, worksheets, grids—any form you need—all are easy to create and fill out. Seventy ready-made, customizable forms are supplied to start you off.

FormWorx with Fill & File is a truly complete forms solution that will save you untold hours—right from the moment you open the shrinkwrap. The

benefits are enormous: real *convenience*, with no waiting to get the form you need; the *flexibility* to revise an outdated form immediately; the *efficiency and cost-saving* of printing forms only as needed.

Here's how the system works. The *FormWorx* module quickly creates any form you need, complete with perfectly placed lines, heads, and supporting text. It works with monospaced and proportional type and uses any font your printer supports.

The *Fill & File* module lets you fill out your new forms—plus any preprinted form. Enter data directly, or import via dBASE or ASCII files. Entries go right to the proper fields. You get extensive math functions, too, plus auto-entry of date,

time, serial numbers, "boilerplate" text, and more.

A "ditto" command repeats carryover information from form to form. And when you work with a *FormWorx* form, both the form itself and the filled-out data are printed simultaneously—which means you don't need to load your printer, or your storage shelves, with preprinted forms. What a labor-saver that is!

For truly comprehensive forms handling, look no further than *FormWorx with Fill & File*. As the chart below shows, it's the clear leader in power and value—perfect for any business, large or small. Try it today!

NEW! Magnavox Metalis Notebook PCs

Light, fast, full-featured PCs for the road, office, or home.
Choose 386SX or 286 power at incredible prices!

If you've put off buying a portable computer because of concerns about power, size or price, your wait is over. Introducing Magnavox's all-new Metalis/386SX and 286 notebook PCs. They're wonderfully small and light. And they make no compromises. Here's what you get:

The Magnavox Metalis/386SX Notebook

- Super-fast 16 MHz 386SX processor.
- Internal 40MB hard disk.
- Internal 2400-baud fax/modem.

The Magnavox Metalis/286 Notebook

- Fast 12 MHz 286 processor.
- Internal 20MB hard disk.

Standard Metalis features (both models)

- 1.44 MB 3.5" floppy drive.
- 1 Megabyte RAM, expandable to 8 megabytes.
- Large, bright, paper-white VGA display with 32-level grayscale capability, backlit for easy reading.
- Up to 4 hours of power with a quick-charge battery.
- Stand-by/Resume power management and on-the-fly battery changing without re-booting.
- GeoWorks Ensemble, a MousePen, and DOS 4.01.
- Ultra-compact, European-look, charcoal-gray case—measures only 8.5" by 11" by 2".
- Ultra lightweight—only 6.9 lbs., with battery!

You can do virtually anything on a Magnavox Metalis notebook that you can do on a desk-bound PC—without compromises. You'll love the included GeoWorks graphical interface and applications. The special black-finish MousePen is a dream to use. And the the 80-key keyboard has full-size keys with great "feel" and includes 12 function keys and a numeric keypad, plus cursor controls in the familiar inverted T format.

Both Metalis models come fully loaded with I/O ports, including parallel, serial, external mouse, expansion bus, external VGA and FDD. An AC adapter/charger is included.

Now, when you travel you won't have to leave office-PC performance behind. With a powerful Metalis Notebook in your briefcase, you'll hardly know it's there until you need it. And when you need it, you'll be impressed by its quality and capability. Order yours now!

Lap-Pac 2 Deluxe
Nylon Attaché

Premier
Leather Case

The Finest Laptop Bags

Computer carry-all plus attaché—these bags have it all.

Lap-Pac 2 Deluxe is the industry standard bag for laptop computers. It gives you a carrying case, briefcase, and portfolio in a single, rugged system. The adjustable main compartment securely protects your laptop with closed-cell foam padding, and there's room for a power supply, cables, and accessories. An additional portfolio compartment handles documents, disks, pens, business cards, and more. A roomy, zippered compartment conveniently stows notebooks and paper. Made of water-repellent nylon with a carry strap, the Deluxe measures just 16.8" by 16.6" by 4". It will hold practically any laptop.

Lappac 2 Deluxe Nylon only **\$99.00**

Manufactured by Targus Corporation.

The new Premier Leather Case provides the ultimate in storage and styling. Crafted of supple leather, the Premier gives you four fully-lined document sections and a padded computer compartment measuring 17" by 13" by 4". Its zippered portfolio includes well-organized storage for disks, cards, pens, keys, and glasses. The Premier measures 18" by 14" by 7" and comes with a removable carry strap.

for pros on the go...

NEW! On the GoFax - Send faxes from any PC—without a fax board!

Faxing from the road: what a hassle! Or at least it used to be. Now there's a convenient and cost effective way to send a fax to any location 24 hours a day—without an expensive fax board. All you need is a phone line and laptop or notebook computer equipped with a modem and *On the GoFax*.

The program is simplicity itself. Just tag your word processing, spreadsheet, or graphics file (PCX or TIFF Group II), select a number from your speed dial list, and let the software do the rest. On the GoFax sends your file to a toll-free service bureau supported by AT&T. The bureau immediately forwards your file to the destination fax number—redialing if it's busy. Your credit card is billed automatically at low page rates. Once the file is sent to the bureau, your computer is free for other business. Best of all, you don't waste time hunting down a printer and fax machine when you're out of the office.

For getting out quick messages, On the GoFax also

comes with its own word processor. And a broadcast feature lets you send the same fax to multiple fax machines at once. On the GoFax can be used from any location that has a telephone: hotel room, pay phone—even a car equipped with a cellular phone.

Faxes are a crucial part of all businesses today, whatever their size. On the GoFax makes faxing truly flexible and effortless—and your business travel smoother and more productive than you ever thought possible. Try it, and you'll agree!

On the GoFax only \$69.95

Order #H3762 for 5.25" disk, or #H3761 for 3.5" disk.

Published by Ibis Software. Requires a Hayes-compatible, 1200 or 2400-baud modem, 512K of memory, DOS 3.0 or later. Supports VGA, EGA, CGA and Hercules graphics displays.

NEW! Rapid Transfer Easy

Fast, simple, reliable data transfer between computers.

Rapid Transfer Easy gives you everything you need for fast, easy, reliable data transfer between any two IBM-compatible computers, from laptops to desktops, old PCs to the latest PS/2s. And with transfer speeds up to 72% faster in serial mode than its higher-priced competitors, it also gives you much, much more for your money.

Simply connect the included universal serial cable between your computers, load Rapid Transfer Easy on both systems, type "transfer" and start sending files. The program automatically determines the fastest rate at which files can be transferred.

Files move at over 115,000 bits per second—all with absolute safety. Special error-checking routines insure that all your data is reliably transferred without data losses.

If you're looking for a fast, easy way to move files between computers, give Rapid Transfer Easy a try. The name says it all.

Rapid Transfer Easy SAVE \$10!

REGULARLY \$69.95 NOW ONLY \$59.95
Order #H3803 (includes both 5.25" and 3.5" disks).

Published by Intertech Marketing, Inc. Includes dual-headed, universal serial cable. Requires a serial port.

NEW VERSION! Co/Session 5.01

Fast, easy, remote computing.

Co/Session lets you operate remote PCs over the phone lines from your laptop or other PC. You might be thousands of miles away, but it's just like being seated at the keyboard of the other computer. Co/Session lets you run programs, access and transfer files, print reports, and more. And the new version boasts up to a 100% speed increase running EGA/VGA graphics files, mouse compatibility, VT100 and VT102 terminal emulation—and is the only remote-control software that supports Expanded Memory.

Co/Session is perfect for home-to-office computing: no more late nights and weekends, no more carrying disks around. It lets you literally work in your office without being there in person.

From your home or the road you can access any computer at your office, sharing data instantly, downloading files, and accessing peripherals. Dual screen/dual keyboard capability lets two users work together: great for training personnel at remote sites and supporting far-flung customers.

Rated as the fastest remote computing software available, Co/Session is the product of choice when you need to reach out and touch another computer. Try it!

TAKE 5 FOR THE ROAD AND SAVE OVER \$250!

- **Squish Plus:** effectively doubles the capacity of hard disks and floppy diskettes (details, page 29).
- **On the Go Fax:** revolutionary new software that makes fax boards obsolete (details above).
- **Rapid Transfer Easy:** the easiest, fastest way to exchange files between computers (see left).
- **Address Book Plus:** our bestselling names and numbers manager (see page 3).
- **Top Priority:** our critically acclaimed to-do list and time manager (details on page 6).

Get the most from your la

LaserTwin & LaserTwin C - At last! HP LaserJet compatibility for your dot matrix, inkjet, or Canon laser printer.

Imagine getting full HP LaserJet compatibility—plus near-laser quality—from an ordinary dot-matrix or inkjet printer. That's what you get with *LaserTwin*. It tricks your software applications into believing your dot-matrix or inkjet printer is an HP LaserJet Series II. Use your software as usual—selecting the HP laser driver at print time—and your printer will emulate a laser. And if you have a Canon laser printer, *LaserTwin C* gives your Canon the HP LaserJet compatibility you've always wanted. Both *LaserTwin* and *LaserTwin C* are RAM resident—so they work in the background and keep out of your way.

The *LaserTwin* packages let you use HP-compatible soft font packages with non-compatible printers. You get access to thousands of new fonts—and a world of larger point sizes. Desktop publishing packages you couldn't use before are now available for creating dynamic reports and other documents. You get landscape (sideways) printing, too, and even a print spooler.

If you've wished for HP laser quality and compatibility, here it is. Try the *LaserTwin* packages. It's like getting a whole new laser printer at a fraction of the usual cost.

LaserTwin SAVE \$20!

REGULARLY \$149.00 NOW ONLY \$129.00
Order #H3492 for 5.25" disk, or #H3491 for 3.5" disk.

SAVE \$70!

LaserTwin & MoreFonts 3.0 TOGETHER ONLY \$228.00

Order #H5272 for 5.25" disks, or #H5271 for 3.5" disks.

MoreFonts 3.0 Fabulous fonts and effects, now with on-the-fly scaling for most dot-matrix, inkjet, and laser printers.

Easy to use and extremely fast, *MoreFonts* is the type-scaling system you need to add style and excitement to WordPerfect, Microsoft Word, Microsoft Works, and all Windows applications. You get 28 scalable typefaces that can be printed at any size you want—all with outlines, patterns, shadows, and background effects. And *MoreFonts* can provide add-on faces—plus you can use any PostScript Type 1 font.

Select font sizes from within your applications. *MoreFonts* instantly scales your selections to size during printing, using a new technology that conserves disk space and printer memory. In fact, *MoreFonts* is the undefeated speed printing champion in all reviews for the past two years!

Whether you own a laser, inkjet, or dot-matrix printer, try *MoreFonts* for crisp, legible text that dramatically improves the appearance of your documents.

MoreFonts 3.0 SAVE \$20!

REGULARLY \$149.95 NOW ONLY \$129.95
Order #H2652 for 5.25" disk, or #H2651 for 3.5" disk.

Published by MicroLogic Software. Requires a hard disk. CGA, EGA, VGA, or Hercules graphics card recommended but not required. Supports all HP LaserJets and DeskJets, Canon lasers and Bubblejets, and dot matrix models from Epson, IBM, Toshiba, Panasonic Okidata, and NEC. Supports WordPerfect, LetterPerfect, PlanPerfect, Microsoft Word, Microsoft Works, and all Windows 3.0 applications. Also works with Ventura Publisher, PageMaker, Microsoft Excel and many others.

NEW! Turbo25
150 of the most popular HP-compatible fonts in a single, economical cartridge.

Now you can get 150 of the most popular and versatile fonts and symbol sets for your HP laser printer—all in a single, inexpensive cartridge.

Turbo25 gives you plenty of flexibility for all your word processing, legal typing, mathematics, and scientific printing—as well as tax forms, graphics, and spreadsheets. You can print as small as 3.6 and 4.8 point for full Lotus and Excel worksheets and up to 24 and 30 points high for headlines and titles that really stand out.

Get started with Helvetica, Times Roman, Prestige Elite, Courier, Letter Gothic, and Presentation typefaces in both portrait and landscape modes. You also get 222 fun and useful Zingbats, three Line Draw fonts, and much more.

Best of all, you're ready to print instantly with this one cartridge—there are no soft fonts to download and eat up valuable time, memory, and disk space. For the most versatile and affordable set of fonts we've found for HP laser printers, order *Turbo25* today!

ser printer!

SmartPrint

**Easy, economical printer sharing.
Now available for serial printers, too!**

Do you want a laser printer for every computer in your office? *SmartPrint*, the advanced new printer-sharing system, makes this expensive proposition a reality—at a down-to-earth price.

With *SmartPrint* everyone can share a single laser printer (or any other printer or plotter) without waiting in line for it. Simply connect the printer and up to six computers to a *SmartPrint* unit—and forget it's there. *SmartPrint* is made in the U.S., and it's fully Hewlett-Packard approved.

SmartPrint automatically handles all demands. When the printer is busy, special spooler software stores the print data in a buffer on your computer's hard disk, then prints it automatically when the printer is free. In the meantime, you go on working in your application. We think *SmartPrint* is well-named. After all, why should an expensive, high quality laser printer stay tied to a single computer, when it could be working productively for six?

Print smart—with *SmartPrint*!

NEW! SmartPrint for Serial Printers

4-Computer REGULARLY \$199.00 NOW ONLY \$179.00

For serial printers only. Order #M2000.

6-Computer REGULARLY \$229.00 NOW ONLY \$199.00

For serial printers only. Order #M2010.

Serial Adapters only \$19.00

Order #M2020 for 9-pin adapter, or #M0230 for 25-pin adapter.

PrintCache

The lightning-fast printer buffer.

If you print long documents or complex graphics and charts, if you work with downloadable fonts, or create desktop publications and presentations, then you know what it's like to wait for your printer to complete its work. It's long, it's slow, and it ties up your computer—and you—in the process. Printer buffers that handle the problem have been around for years, but there's never been one like *PrintCache*.

PrintCache is simply the fastest, most advanced "spooler" available. It's also small, simple, and completely transparent in operation—just what a good utility should be. Once you've installed it, you can forget it. Printing proceeds as usual, except that now you get your computer back much sooner. And as an added bonus, *PrintCache*'s optimized graphics printing routines give you full-page 300-dpi graphics on 512K HP LaserJet II and IIp printers—no more "out of memory" errors.

Take the "wait" out of your printing chores, and get your computer back fast—with quick, easy *PrintCache*.

"Warp-speed printing... a scanned image that locked up a 386/20e for 6 minutes was gone in 3; a five-page Word document ... that took 2 minutes to print was spooled in 5 seconds... you'll be flabbergasted ... PrintCache is a godsend."

—PC World

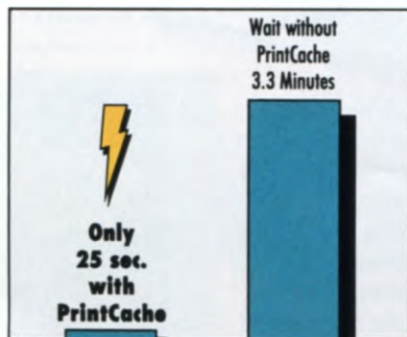

PrintCache

SAVE \$20!

REGULARLY \$149.00 NOW ONLY \$129.00

Order #H2673 (includes both 5.25" & 3.5" disks).

Published by LaserTools. Requires DOS 2.1 or later and a hard disk. Supports all dot-matrix and laser printers, and plotters.

SmartPrint for Parallel Printers

2-Computer REGULARLY \$129.00 NOW ONLY \$119.00

For parallel printers only. Order #M1307.

4-Computer REGULARLY \$199.00 NOW ONLY \$179.00

Computer-to-SmartPrint connections require DB-25 male/male cables. Cables can be up to 50' long. **Serial printers:** SmartPrint-to-printer connection requires DB-25 male/male cable. Computer-to-SmartPrint connections require a serial adapter kit for each computer. Connections are via standard telephone cable.

CALL FOR DISCOUNT CABLE PRICES!

NEW VERSION! Laser Envelopes Release 3.1

More flexible than ever—even prints postal bar codes!

Laser Envelopes Release 3.1 handles up to eight laser fonts at a time, positioning both mail and return addresses on envelopes from small to large, international size. It conveniently previews each envelope on-screen. And you can key in addresses or use the new address grabber to import addresses from another application.

The new version also prints postal bar codes. Just switch on bar code mode, and *Laser Envelopes* reads the zip code from the screen and prints the bar code in just the right spot, using your laser printer.

For big printing jobs, *Laser Envelopes* now reads mail-merge files from such popular programs as WordPerfect, Microsoft Word, Wordstar, and dBASE III—plus comma-delimited ASCII files.

You can also define up to six different default return addresses and six different special message lines.

The new user interface (with mouse support) has pull-down and pop-up menus. On-line help is only a keystroke away.

Now is the time to put a professional face on your correspondence with *Laser Envelopes Release 3.1*.

Laser Envelopes only \$59.95

Order #H4012 for 5.25" disk, or #H4011 for 3.5" disk.

Published by E.R.M. Associates. Supports HP LaserJet and DeskJet, (all models); Okidata LaserLine 6; Panasonic KX-P4450.

Express Publisher 2.0

NEW VERSION! Our top-selling desktop publisher makes it easy to look good in print.

It's official: *Express Publisher 2.0* is now the best-selling, budget-price desktop publisher on the market. And it's no wonder. Express Publisher delivers professional-quality DTP to nonprofessional users. As the examples above amply demonstrate, you don't have to be a graphic-design expert to look like a pro, when you're using "Express."

- Here are just a few of the exclusive features you get:
- Revolutionary TextEffects, including curved, rotated, and fit-in-polygon text, plus stretched, shaded, reversed, and shadowed type.
- Fully editable enlarged and reduced page views, for better control.
- Landscape printing, for publications that need a broad presentation.
- Auto-wrap, an option that instantly wraps text around graphics.

Our scalable outline fonts let you set type styles and sizes as you work. All type is instantly adjustable from 6 to 144 points. You get AGFA Compu-graphic's CG® Times, CG Triumvirate™, and CG Univers fonts with the program, plus five new display fonts for extra headline impact. Soft fonts from MoreFonts and others are fully compatible. And everything prints at the highest resolution your printer can deliver—up to a full 300 dpi on lasers.

The Express Publisher interface is simple and intuitive. And with exciting new TextEffects (right) you get creative power you can't get anywhere else.

Seeing is believing! We ran a contest, and this is just a sample of the outstanding work we received—all designed and produced by our customers with Express Publisher 2.0!

Linked text frames with auto-flow let a story begin on one page and continue on any other. There's automatic hyphenation, kerning, and tracking—plus a fast search-and-replace function for quick editing. Word processing files are imported with enhancements intact.* And you get drawing tools for boxes, lines, circles, and more.

Dozens of professional art images are included, and special portfolios are available at right. Express Publisher also handles art in all popular file formats.** You also get support for Professional Write, PFS:Write, and Harvard Graphics (CGM) files, plus an on-screen tutorial.

Now, more than ever, the choice is clear. For truly professional-quality publishing at a truly affordable price, it's Express Publisher all the way.

FREE BONUS!
Promoting Your Business...

Regularly \$29.95, Promoting Your Business gives you templates and instructions for newsletters, brochures, ads, and much more. It's a terrific time-saver!

The Complete Scanners

The fast, easy way to "go graphic" in your documents.

These fine scanners from The Complete PC are the best you can buy. Each includes Smart-Scan software for resizing, rotating, cropping, editing, combining multiple images, and saving your work in all major graphics-file formats. Just choose the scanner that meets your needs:

The Complete Half-Page Scanner scans subjects up to 4.1" wide and 14" long at 200, 300, or 400 dots per inch. For a limited time, it also includes PC Paintbrush Plus (a \$99 value) FREE.

And if you want to scan-in text and work on it with your word processor, our optical character recognition (OCR) software bundle is for you. It includes the scanner, plus ReadRight OCR software that converts your Half-Page Scanner into a fast, capable text reader (see below, right).

Full-Page Scanner now includes Calera Wordscan OCR Software!

The Complete Full-Page Scanner scans pages up to 8.5" wide and 14" long at 200 or 300 dots per inch. It's great for larger graphics and charts. Priced at less than half the cost of most page scanners, this fast, compact machine is a real price/performance breakthrough.

Now, for a limited time, The Complete Full Page Scanner includes the latest edition of the famous Calera Wordscan OCR software at no extra cost. With it, you can scan in entire pages of text, quickly save them as word processing files, then alter and edit them as needed. This quick, simple process saves dozens of hours of rekeying printed text.

Order one of our fine scanners today, and discover the power of pictures—and OCR!

NEW! Scan:Align

Fast, perfectly-aligned hand scanning is here!

With new Scan:Align, your hand scanner will perform just like an expensive table top model. Just position your original under Scan:Align's top cover and place the scanner in the sliding template.

Your scanner is perfectly aligned, for quick, consistent, scans.

Six templates fit all popular scanners, and automatic overlap makes OCR, text, and full-page scans really easy. You'll save hours of rescanning and image clean-up time with Scan:Align. And our low price lets it pay for itself immediately. Order yours today!

Labels Unlimited 3.0

NEW VERSION! Now, the most impressive labels are also the easiest and fastest to create.

With *Labels Unlimited 3.0*, you can create labels that look like they were designed by the most expensive graphic artist—and do it quickly and easily.

Whatever your purpose—from mailing and inventory labels to audio or video cassette labels and jars of homemade jam—*Labels Unlimited 3.0* gives you presentation-quality, laser-sharp type and graphics, plus a wealth of layout possibilities.

Two 300-dpi fonts, scalable from 4 to 144 points, with bold and italic enhancements, are standard. And Express Publisher fonts are fully compatible (see page 38). PCX

graphic support lets you use clip art, scanned images, logos, and more. You can even “shade” images behind type. Included, too, are dozens of art images, borders, and “dingbats” to get the custom look you need.

Six adjustable text/graphic zones per label give you a wide variety of layout options. You can rotate words and images within each zone, and an on-screen preview feature ensures that everything looks just right before you print.

Automatic incrementing on any line lets you create sequentially numbered labels for parts boxes and shipping cartons. And you can use date and time “stamping.”

When you want a series of labels where only a line or two changes from label to label, a handy “ditto” feature duplicates line entries on successive labels. And easy import and export of database and word processor data

lets you use information stored in other programs without rekeying.

Labels Unlimited 3.0 is preconfigured to print on laser and pin-feed labels from Power Up, Avery, 3M, and other label manufacturers. You can also print on custom sizes up to 11” by 13”, working in 1/16” intervals. All printers are supported at high resolution.

It's easy to achieve eye-catching, top-quality results with *Labels Unlimited 3.0*. And, as many thousands of our customers have discovered, there's no easier, faster way to get the job done.

Labels Unlimited 3.0 **SAVE \$20**

REGULARLY \$89.95 **NOW ONLY \$69.95**
Order #2462H for 5.25" disk, or #2462F for 3.5" disk.

Supports IBM Graphics, Proprinter, XL24; Epson (all models); HP LaserJet (all models), DeskJet, PaintJet; Okidata 84, 92, 93, 182, 192, 193, 292; C. Itoh Prowriter; NEC 8023; Toshiba P321, P351; Apple ImageWriter. Preview feature requires graphics card (otherwise, no graphics card required).
