MediaPro™

Project power from multiple sources. Accepts direct input from computer video or conventional video—from computers, VCRs, laser disc players, television receivers, etc. Use up to four at a time. Project multiple sources without multiple projection devices or inconvenient equipment changes. Accomodate over 32,000 rich, saturated colors for beautiful images. Lightweight and portable, MediaPro can be placed in its carrying case and taken anywhere. MediaPro delivers superb image quality, versatility, and ease of use for your meetings, demonstrations, and training sessions.

ViewFrame Spectra & SpectraPlus

Captivate your audience with color. With 4,096 colors and advanced LCD technology, Spectra projects slide-like images, even animation, in saturated, high-contrast colors. For projection of sophisticated graphics, 3-D models, digitized color photos and captured computer video, nView offers SpectraPlus, with a palette of 32,000 colors. The use of true color and moving images in presentations vastly increases your audience's interest and retention. Compatible with IBM, Apple and other personal computers, portable and easy to use. Cables, carrying case and remote control included in one package for powerful presentations.

ViewFrame II+2

Award-winning gray scale projection power for your computer. Text and graphics are sharp and clear when you project them with the ViewFrame II+2 LCD projection panel. Superb contrast in your choice of 8 true shades of grey or pixel patterns. Two times PC Magazine's Editor's Choice, they said, "... splendid image ... excellent contrast ... an excellent buy." No more shuffling transparencies, no more flip-charts and markers. Project your message electronically with the ViewFrame II+2.

nVIEW Accessories

nVIEW has the cables and adapters you need to use your computer with ViewFrame and MediaPro LCD projection panels. nView carries accessories for the entire Macintosh family, IBM, DEC, AT&T, Atari, and composite computers. nVIEW also offers the TOTEBOARD, a mobile keyboard specially designed for on-line meeting management, group computing and as a way to keep the meeting room clear of your projecting equipment. All the keys are standard with no complicated macros to program or learn. Presentation power at your fingertips.

nVIEW Can Help Your Audience See The Light.

nVIEW Corporation is a pioneer in the area of integrating technology to allow small to large groups instant access to computer based information, view it easily, make decisions, and develop action plans based on the interaction of the individuals involved. Improved communication, in any situation, produces improved results.

In the early 1980's, nVIEW developed the world's first Liquid Crystal Display computer projection peripheral. The company continues to innovate in the field of meeting management technology and to manufacture products which increase the accessibility of information and increase the productivity of individuals and groups.

nVIEW products are available around the world from a network of dealers and distributors. nVIEW offers toll-free customer and technical support from the company's home office in Newport News, Virginia. Call nVIEW today for the dealer nearest you.
