

About Our Company

The GRC story, now 60 years in the making, actually had its genesis on March 19, 1928. That's when company founder Willis Daggs joined Rochester Ribbon and Carbon. His passion for quality and excellence helped grow the business dramatically.

When the appeal of California's warmer climate finally got the best of him, he moved his family to Van Nuys, arriving on March 2, 1946. It took awhile for his machinery to arrive, and then to be fixed, but The Daggs Company began producing 'Hollywood Brand' ribbons in July of 1946.

In the Fall of 1955, Willis decided it was time to incorporate. He pondered over names for quite some time, finally landing on General Ribbon Corp. He figured if the name was good enough for General Electric and General Motors, it was good enough for him!

In the years that have followed, much has changed. Ribbons are only a small part of our business now but the legacy of quality, excellence, and commitment to our people lives on. And a satisfied customer has been, and will always be, our greatest achievement.

Machine and Model Reference List

GRC's Machine and Model Reference List provides a quick, convenient way to determine which products fit on your machine. For a more comprehensive listing, check out our website... www.printgrc.com.

1. Find your machine / model number in the chart that follows.
2. Identify the various options available to you.
3. Refer back to the pictorial section to confirm selection(s).

Ink Level Resetter
QRN: R53

Important Note: Refilling cartridges can be extremely cost effective compared to the cost of buying new cartridges. However, cartridges wear out over time and there is no way to predict exactly when that will happen. There are also special precautions that must be taken during the process and these are outlined in the instructions provided. By use of this product, the user accepts all responsibility for the cartridge's performance after refilling.

Machine and Model Reference List

GRC's Machine and Model Reference List provides a quick, convenient way to determine which products fit on your machine.

1. Find your machine/model number in the chart that follows.
2. Identify the refill options available to you.

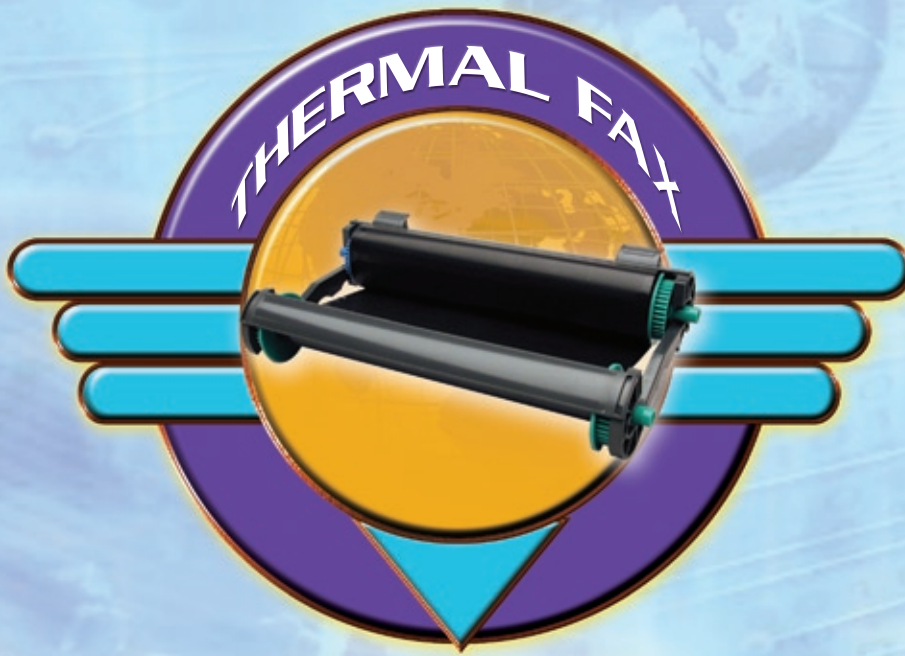

Machine/Model	Resetter	Refill	Machine/Model	Resetter	Refill	Machine/Model	Resetter	Refill
