GTE FLIP-PHONE® II

TELEPHONE

Get ready to flip again because here comes the GTE Flip-Phone® II telephone. With more colors. And more features. We've added a "Redial" button which automatically redials a busy number. With the "Mute" button you can silence the noise at your end any time you want. And the tone ring now has three positions—"HI-LO-OFF"

These are all added to its flipped-out, pushbutton, one-piece design. So it's still small. It's still sleek. And, oh yes, it still flips.

So why just call out when you can flip out with the new Flip-Phone II.

\$44.95

Shpg Wt: 8 lbs Item No. FLIPPH2 Retail: \$69.95

GTE FLIP-PHONE® III

TELEPHONE

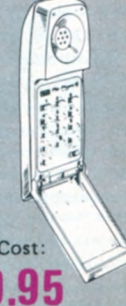

GTE now offers the popular Flip-Phone telephone with an easy to use 10 number memory dialing feature. You can store up to 9 frequently called or emergency numbers you program plus automatically redial the last number manually dialed.

And yes, the Flip-Phone III offers many more features such as the Universal Dialing Keypad, mute, reset, and an adjustable volume electronic tone ringer. A 14 foot half coiled/half straight modular line cord is also included.

EX-4000 Touch-to-Talk Cordless Speakerphone

Extend-a-phone

• For the first time, a touch-to-talk speakerphone allows you the option of answering the phone at the base unit, no matter where the handset may be. Of course, you can still answer the handset itself, anywhere up to 700 feet from the base. • Built-in intercom for communicating from the handset to the base speakerphone; or, you can plug a conventional phone into the base unit, for totally private intercom use. • AutoSecure — foolproof protection that stops anyone else with a cordless phone from using your phone lines. • On/off switch lets you override this feature so you can use the base unit with more than one handset. • Base speakerphone. • Handset intercom — for direct communications between the handset and the base unit speakerphone. • Soft-touch dialing. • 700-foot range. • 2-way paging — tone signaling from either the handset or the base. • Last number redial button. • Volume control. • Automatic recharge — place the handset in the base, and the powerful nickel cadmium batteries recharge automatically. • Full charge allows up to 12 hours of operation. • Ideal for wall mounting or desktop use. • Plugs into a modular phone system. • For older 4-prong systems, a "TA03" adaptor is necessary (not included).

EX-3000 Full-Featured Cordless Phone

\$149.95

extend-a-phone

Item No. EXP3000
Retail: \$189.95
Shpg Wt: 8 lbs

• Full-featured cordless convenience. • Range of approximately 700 feet. • Place and receive calls at the touch of a button or switch. • Cordless. • AutoSecure® — for foolproof protection against anyone else with a cordless phone using your phone lines. • On/off switch lets you override this feature, so you can use an EX3000 base unit with more than a single handset. • Last number redial. • Soft-touch dialing. • Volume control. • Call button — a single touch at the base unit, and an audio signal sounds at the handset. • A quick glance at the indicator lights tells you that the phone is plugged in properly, that the nickel cadmium batteries are charging, and when the phone is in use. • Crisp, clear audio. • Automatic recharge when handset is placed in the base unit, and powerful nickel cadmium batteries recharge themselves. • At full charge, the receiver will operate up to 12 hours. • Ideal for wall mounting or desktop use. • Plugs into a modular telephone system. • Takes about one minute to install. • Base: 5.3" x 9.3" x 2.6". • Handset: 2.4" x 8.0" x 3.2".

EX-7000 Cordless 'Bedside' Phone

• Cordless dial/receive phone with an AM/FM radio that features a liquid crystal readout of time, an alarm set, and a built-in snooze, all in a compact bedside unit. • The handset enables you to enjoy two-way conversation up to 50 feet from the base unit. • Features selective on/off auto-secure. • With the flip of a switch the AutoSecure provides absolute protection that no one gains access to your phone line. • In the "off" mode you can use other handsets through your single base as you would an extension phone. • Other features are: soft-touch, pushbutton dialing. • Automatic redial of last number. • Variable volume control. • Cancel switch. • Mute switch to momentarily put the other party on hold. • Handset recharges automatically when placed in the base station. • Clock radio features: sliding volume control, snooze button, sleep button, alarm display, wake to the alarm or to your favorite music station; choose between AM or FM band. • Unit is easily installed — simply plug into modular telephone jack and AC outlet. • Uses NiCad batteries (included).

COPAL: ACTIMETER

Get the most from your exercise program using **THE ACTIMETER!**

ELECTRONIC PULSE METER/TIMER UB-103

Item No. CLACTMTR

Shpg Wt: 2 lbs

Retail: \$129.95

Your Cost **\$79.95**

When you're exercising, its extremely helpful to know whether your activity is appropriate and safe for your physical condition. The ACTIMETER gives you this information by measuring your pulse. Simply set your upper & lower pulse limits and a programmed electronic beeper sounds to keep you at the optimum level of exercise.

PEST-SHIELD™ – safe, effective, economical pest control

Pest•Shield™ units are safe because they operate above the frequency level of humans, dogs, cats, birds, fish and plants.

Pets in the rodent family, such as hamsters or gerbils, need to be isolated in a closed room; however, Pest•Shield™ will

not interfere with T.V., T.V. remote control units, radios, pacemakers, hearing aids or automatic garage door openers.

- Costs pennies per day to operate • Maintenance free • Totally odorless • Proven effective through laboratory testing • 45-day money back guarantee • 36-month limited warranty on Models 1500 and 2500 • 12 month limited warranty on Model 8000.

MOSQUITO SHIELD
Your Cost \$19.95

ULTRASONIC

PEST-SHIELD™ offers 3 models

Future-Life Products, Inc. offers 3 models of Pest•Shield™ for total effective control. Model 1500 covers up to 1,500 square feet, model 2500 protects up to 2,500 square feet, while model 8000 is for commercial application covering up to 8,000 square feet, with 20 feet ceilings. If the Pest•Shield™ unit placement requires that the sound waves be contained and cannot flow through the premises such as in attics or basements, more than one unit may be necessary. Metal and wooden objects intensify ultrasonic sound, while carpets, drapes and soft furniture will reduce the optimum range.

Installation is easy

Model 1500 and Model 2500 are as easy to install as a toaster or a table lamp. Simply plug them into any 110 volt outlet and Pest•Shield™ begins to work immediately. A red indicator light on the front panel tells you the unit is operating. A test button is provided that reduces the unit's sound level to 5,000 Hz, which is audible to the human ear. After testing, release the pressed button and the frequency automatically returns to the set frequency sweep. Since there are different communication levels for insects and rodents, Pest•Shield™ automatically sweeps their frequency ranges 60 times per second, thus maintaining maximum coverage. Model 8000 consists of a Master Control Unit and an Overhead Unit that uses low voltage, meets all electrical codes and can be installed by anyone.

PEST-SHIELD™ gives results

Pest activity may increase the first few days of operation due to the confusion created by the ultrasound waves. However, after two weeks there will be a substantial decrease in pest activity. In heavily infested areas, this process could take as long as six weeks.*

*An occasional rodent or insect may appear after the initial six week period. Only adult pests have fully developed auditory senses, therefore Pest•Shield™ will not affect the larvae, egg, or early development stages of most pests. A pet or an open door may allow an insect or rodent into the premises, but once exposed to the ultrasound, they will soon leave.

Casiotone 701 Learns The Score...

Musical scores are input to memory by merely whisking the Music Setter over bar-coded music sheets for exclusive memory use. Even those who can't read music can start playing right away!

And Teaches Key Sequence To You!

Keyboard lamps light one by one in sequence, teaching you the keys to play. Even people who don't know music can immediately start playing. Just try it! The lamps are your guide.

Shpg Wt: 35 lbs

Memory Performance Functions-Input

MS Memory: Casio's unique Music Setter reads specially bar-coded musical scores and memorizes musical pitch, length and chord.

Lightly brush the tip of the Music Setter from left to right over a bar-coded line on the sheet, and then repeat this same operation for the following lines. Memorization can be done easily by anyone.

Manual Memory: Original compositions and favorite melodies input with 5 program keys and the keyboard.

Memory Performance Functions-Output

Automatic Melody Performance: Performance of memorized melodies along with genuine rhythm and bass accompaniment at one touch of a key.

Melody Guide: Even if you can't read music, you'll be playing in no time at all. Melody Guide indicators light up in sequence of play to teach you which keys to press.

One-Key Play: Anyone can enjoy true-to-life performances with just one finger.

By pressing the One-Key Play key, memorized notes can be simply played together with rhythm and bass accompaniment.

Auto Accompaniment Functions

Casio Chord: For chord, bass and arpeggio accompaniment linked to rhythms with one finger.

Chord Indicators: Automatically distinguish the depressed chord and display chord name by lamps.

19 lamps over the accompaniment keyboard mark the chord names: for example, "A" lamp and "maj7" lamp light up to indicate "A major 7". A thoughtful convenience letting anyone read the chord at a glance.

Basic Performance Functions

20 Beautiful Sounds, Authentic 61-Key Keyboard.

Enjoy the full scope, from acoustic

instruments such as piano to electronic sounds. With a 5-octave range and 8-note polyphony, chord performance is yours to choose.

16 Auto Rhythms Match All Sorts of Music.

■ 20 gorgeous preset sounds: Pipe organ, diapason, tibia, flute, jazz organ 1, jazz organ 2, piano, vibraphone, celesta, oboe, funky, brilliant organ, woodwind, full tibias, piccolo, electric piano, marimba, chime, bassoon, wah brass.

■ 16 authentic rhythms: March, boogie woogie, swing 1, swing 2, waltz, jazz waltz, rock, rock'n'roll, disco, slow rock, bossa nova, samba, beguine, rumba, tango, mambo.

■ 61-key, 5-octave keyboard.

■ Built-in speaker, compact size for anywhere performance.

■ Equipped with tuning control.

■ Optional foot volume control, sustain pedal available.

■ Dimensions: 958mmW x 341.5mmD x 127.5mmH including projections.

BSSR227	Split receptable custom wall module	23.95

BSR SYSTEM X-10

The BSR X-10 System offers several benefits:
Security: outsmart burglars by controlling interior/exterior lighting and appliances. • **Convenience:** it can start your morning coffee, pre-cool a room in the afternoon, etc. • **Safety:** have lights on when you arrive home. • **Energy-Saving:** instantly turn off unused lights and appliances.

BSR TC262 The Timer with Battery Back-Up

BSR SYSTEM X-10

Your Cost
\$79.95

Item No. BSTC262

Shpg Wt: 5 lbs

• Automatically turns lights and appliances on and off. • Battery back-up system ensures the memory if power is lost, no need to re-enter your code. • Simply plug in The Timer and the BSR X10 modules in AC outlet. No special wiring needed, signals are sent over your existing wiring. • Set lights and appliances to go on and off up to twice a day. • Run your house like clockwork, whether you're home or not. • Feel secure, when you are on vacation, with random lighting of your house lights. • Three ways to set the lights and appliances: daily — sets lights and appliances to go on and off exactly at the same time every day; once — sets things to go on and off one day at a time; security — lights and appliances go on and off at random times within a half-hour of pre-set times. • All lights on key instantly turns on all lights at once. • All lights off key turns all lights off instantly. • Digital clock with 2 levels of display brightness. • Fast and slow keys for accurate time setting. • Sleep feature. • Clear key. • Controls 8 lights and appliances with each timer. • UL listed. • Black with wood-grained finish of high impact plastic. • 110/120 volts AC. • 5-3/4" x 3" x 5-1/8".

BSR TR2700 System X-10 Telephone Responder Controller

Item No. BSTR2700

Your Cost
\$119.95

Shpg Wt: 5 lbs

• Control up to 8 lights and appliances from one location, even when you're not there. • Compatible with all BSR System X-10 products and can be added to your existing X-10 system. • System includes the command console and a remote unit small enough to fit in a purse or shirt pocket. • Remote unit duplicates all the functions of the command console — all modules on; all modules off; individual modules 1 — 8 on or off. • The TR2700 is simple to operate: dial in your phone number; the command console answers the call after 40 seconds. • Place the remote unit over the mouthpiece of the handset; program the preset security code and listen for the acknowledging tone from the command console and program in your instructions from the unit to your lights and appliances. • No costly installation — simply plug the console in a standard AC outlet and telephone jack; plug appliances and lights into modules and then into an AC outlet.

BSR TH2807 Thermostat Controller Set

Shpg Wt: 5 lbs

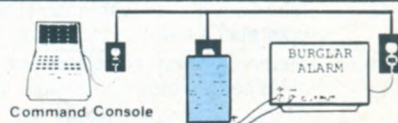

Your Cost

\$37.95

Item No. BSTH2807

• A temperature regulator which mounts under your existing thermostat. • Two thin wires in a self-adhesive transparent sheath sticks to the wall and runs down to connect to a low voltage adaptor. • Plug into an appliance module or wall receptacle module. • Set-back control is achieved by turning the appliance module on from a BSR System X-10 Timer or TR2700 Telephone Responder. • Choose the degree of variation or set-back you desire, i.e., 5 (1), 10 (2), 15 (3), degrees. • For example: to drop temperature from 70° to 60°F when you are not at home, set the temperature regulator 10° (or 2), leaving your thermostat set at 70°F. • The regulator adds some local heat under the thermostat, which fools it into thinking the room is warmer than it really is, i.e., 80°. • The thermostat will turn off and cool the room to 80°. • Should the room cool below the desired 80° level, the thermostat would turn the heat on. • Program the timer to turn the module "OFF" (or 0) before you return home allowing the temperature to climb to 70°. • The reverse process is used for controlling the air conditioning thermostat.

BSR BA284 Burglar Alarm Interface

• Connects to dry contact closure or low voltage output terminals in burglar alarm control box equipped with such terminals. • When attached to a central alarm system only one unit is needed. • Unit may also be used to protect one specific area, i.e., a back door only. • When burglar alarm system is activated, BA284 Interface/Controller transmits one of the three following signals: 1) All lights on, plus selected appliance module on (a siren, for example), 2) All lights flashing, 3) All lights on.

LOOKING FORWARD

A dedicated group of people who want to help . . .

**Give a gift of life —
Give a gift of health —
Get this exceptional exercise program**

Looking Forward was founded by an internationally known Yoga expert who has specialized in health and physical therapy for over 20 years, and two health-conscious women who have been involved in civic volunteer work, health and exercise programs.

This trio came up with the idea to help Mature and Senior Citizens through Yoga exercise classes. As an experiment, they started with one Yoga class especially conceived for Mature and Senior Citizens who ranged in age from 50 to 87 years; one was in a wheel chair.

The results were spectacular and the class has continued to give these mature and senior citizens a sense of well being, physically and spiritually.

There are millions of Mature and Senior Citizens who need daily exercises, at home, in rest homes, in hospitals and other locations. To make these exercises available to anyone, the Looking Forward Organization produced several Video Cassette Recordings in color, featuring Mature and Senior Citizens exercising to inspiring music.

It is imperative that Mature and Senior Citizens must be helped: do not forget that you too will become a Senior Citizen, so help someone in your family or a friend who is either a mature or senior citizen and buy one VCR either Beta or VHS format and help.

If you wish to participate and contribute to this program, order one Video Cassette Recording of 30 minutes of Yoga classes for \$49.95 or if you wish to order a VCR of only 15 minute exercises for \$39.95, please call the toll-free numbers and either charge to Visa or MasterCard, or mail your order with your check for either \$39.95 or \$49.95 each, to Olympic Sales Co.

Narrated and presented by the famous television and motion picture star, Mr. Lorne Greene, the star of "Bonanza," who does believe that the Mature and Senior Citizen's cause is a worthwhile one, deserving assistance.

SR11 FM STEREO
MICROCASSETTE™ RECORDER
OLYMPUS

Astonishing OLYMPUS

Olympus Optical Co., Ltd., is a high technology company with products spanning the opto-electronics field. With a strong corporate commitment to original research, it has an astonishing number of 'firsts' to its credit. For example, it was OLYMPUS who invented the MICROCASSETTE™, and pioneered the concept of true pocket recorders for business and leisure use. In the camera field, where it is probably most widely known, major OLYMPUS triumphs include the OM single lens reflex cameras and system, and the sensational XA "Capsule Cameras." It was also OLYMPUS who invented and developed fiberoptics for medical and industrial use. And the company is equally a world-renowned leader in products as varied as microscopes, hospital equipment, video equipment, precision measuring instruments, etc. Inspired originality and uncompromising professionalism make OLYMPUS a name to rely on, and a name to reckon with.

Actual size

The MICROCASSETTE™

Invented by OLYMPUS in 1969, the Microcassette has become virtually universal for quality pocket recorders throughout the world.

OLYMPUS started the true pocket recorder revolution when it developed this incredibly small, high precision tape cassette. It's smaller than a matchbox, but thanks to superb engineering and advanced technology utilizing the constant speed capstan drive system, performance is uniformly high throughout the tape's entire length. Available in both standard MC-60 and low noise MC-60 AD versions, the MICROCASSETTE gives a whole hour of recording at standard speed, or two hours at slow speed. And the MICROCASSETTE design is compatible with many major recorder brands.

MICROCASSETTE

CRAIG
Model J570
Microcassette Transcriber, 2 Speed

Your Cost:
\$219.95

The compact, efficient styling of the CRAIG J570 Microcassette Transcriber encloses a rugged mechanism designed for the daily usage of a busy office. The Microcassette system provides quality voice reproduction in a convenient, attractive design.

For transcribing, a two-motion footswitch starts and stops the tape and permits controlled backspacing to review just-played words and phrases. Quick-erase capability allows clearing of already-transcribed material during rewinding of the cassette.

• Battery Pack	: BP-23	25.00
• Car Cord	: DCC-127A	29.50

TCM-141
Item No. SOTCM141
Shpg Wt: 6 lbs
RE: \$129.95

\$114.95

- Hand-held cassette-corder
- TAB marker system.
- Speed control (+50, -30%)
- Mic sensitivity control
- Tone control
- Supplied Access: AC Adaptor (AC-9W)
- AC/DC - 6V, 4 "AA" cells

OPTIONAL ACCESSORIES

• AC Adaptor	: AC-9W	12.00
• Battery Pack	: BP-23	25.00
• Car Cord	: DCC-127A	29.50

TCM-7
Item No. SOTCM7
Shpg Wt: 6 lbs
RE: \$149.95

\$129.95

- High performance cassette-corder
- Electronic feather touch operation
- Mic sensitivity control (high/low)
- Counter inertial flywheel
- Speed control (+30% - -20%)
- Safety "Mode Lock"
- Supplied Access: AC Adaptor (AC-39) earphone, carrying case, demonstration tape, shorting plug
- AC/DC - 3V, 2 "AA" cells

OPTIONAL ACCESSORIES:

• Car Cord: DCC-127A	29.50
• Connecting Cord: PC-200	4.50
• Battery Charger & Battery: AK-30P	22.00

TCM-737
Item No. SOTCM737
Shpg Wt: 6 lbs

\$49.95

- Desk top/portable
- Tone control
- One touch recording
- Cue/review/locking pause
- AC/DC - 6V, 4 "C" cells

OPTIONAL ACCESSORIES

• Earphone	: MDR-E3	16.00
• Foot Switch	: FS-10	10.00
• Car Cord	: DCC-127A	29.50

ICF-6500W AM/FM WORLD BAND RADIO

- AM/FM/SW high performance receiver
- All band LCD frequency readout
- Slow/fast tuning dial
- AM sensitivity switch
- Supplied: AC Adaptor (AC-160 W)
- AC/DC - 9V; 6 "C" cells

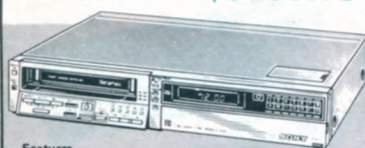

OPTIONAL ACCESSORIES:
• DCC-120: Car cord 36.50
• AN-60: External antenna 25.00

SL-2500

RE: \$1500.00

Item No. SOSL2500
Shpg Wt: 32 lbs

\$1069.95

Features

- Ultra-sophisticated, ultra-compact front-loading Betamax home videocassette recorder
- 5-hour recording capability with L-830 cassette; 20-hour recording with optional BetaStack AG-400 programmable videocassette autochanger*
- New "Swing Search" function for continuous playback in forward and reverse at five different speeds
- BetaScan II high speed picture search
- Crystal Clear playback: "noiseless" Freeze Frame, Frame-by-Frame Advance, and Swing Search slow motion speeds with Sony's Double Azimuth Head
- Complete wireless remote operation with supplied RMT-312 Remote Commander of all key functions, including channel change
- Programmable 14-day/4 event timer
- Full-logic microprocessor-controlled feather touch function buttons positioned for easy access on front panel
- New Tab Marker Indexing System for instant access to up to nine indexed program segments; tab marker signals can be recorded or erased as desired
- Linear Time Counter gives continual readout of elapsed time during any mode in hours, minutes, and seconds
- Tape Remaining Indicator: 6-step LED indicator shows approximate tape position in any mode
- 14-pushbutton Express Tuning with semi-automatic channel presetting
- Auto Rewind when tape end is reached
- Auto Playback from rewind mode
- "Error" indicator lets you know if your programming instructions are correct and reminds you to insert a cassette
- 10-minute power backup system saves your timer settings if power is temporarily interrupted
- Built-in 14-pin camera connector
- New Micro Timing Phase (TP) circuitry for "noiseless" transitions between recorded segments
- Record/Review function when using a Trinicolor HVC-2200 or HVC-2400 color camera
- Beta I, II, III LED indicators (recording in Beta II or III; playback in Beta I, II, or III)

Supplied Accessories:
• RMT-312 wireless Remote Commander, L-165 Betamax videocassette, EAC-24 external antenna connector (75-300-ohm matching transformer), EAC-25 external antenna connector (300-75-ohm matching transformer), 75-ohm coaxial cable with F-type connectors (2m), 300-ohm ribbon-type lead-in (2m), channel number segments

SL-5800

RE: \$1295.00

\$1039.95

Item No. SOSL5800
Shpg Wt: 48 lbs
RE: \$1295.00

- Variable speed BetaScan picture search system at any speed between 5 and 20 times normal in Cue and Review.
- Crystal clear: Freeze-Frame, Frame by Frame picture advance and variable speed Slo-Motion at any speed between 0 and 1/3 normal speed.
- 14 days/4 events programmable time on up to 4 different channels.
- Three times normal speed "Fast Play."
- Records up to 5 hours on L-830 tape.
- Extended recording time capability for up to 20 consecutive hours (with 4 L-830 tapes). Programmable recording capability or recording each show on each video-cassette up to four shows, even in timer mode. Both features available when used with optional accessory AG-300.
- Time Commander Remote Control for variable speed BetaScan, Pause/Freeze Frame, Frame by Frame picture advance, variable speed Slo-Motion, 3 times Fast Play and Fast Forward/Rewind.
- 10 minute backup for clock advance and memory hold in event of power failure.
- Record and Playback on Beta II and Beta III; playback also in Beta I.
- Electronic indexing system/"Tab Marker" and memory tape counter.
- Fully logic micro-processor controlled function keys.
- Express Tuning: 14 pushbuttons.
- Audio dubbing.
- Auto rewind capability when the tape reaches the end.

Supplied Accessories:
• L-250 tape
• Remote control commander (RM-58W)
• Antenna adaptors (EAC-24 & EAC-25)
• 75-ohm coaxial and 300-ohm twin lead cables

Optional Accessories:
• BetaStack: AG-300
• Video Rack: SU-153 170.00

Optional Accessories:
• BetaStack: AG-400 150.00
• Video Rack: SU-153 170.00
• 10-key UniCommander: RM-709D 99.95
• 14-pushbutton UniCommander: RM-711D 99.95
• Color Camera: HVC-2400 1,250.00
• Color Camera: HVC-2200
• Camera Extension Cable: CCK-5 48.00
