HIGH-SPEED PRINTING (4 PPM)  
A FULL MEGABYTE OF MEMORY • WIDE COMPATIBILITY

# LaserPrinter 4

*Good things come in small packages.*

# Small size and big performance.

The Star LaserPrinter 4 is like a precious diamond. It's engineered to give you sparkling results. While it's small enough to fit on virtually any desktop.

Don't let its compact size fool you. It's fast. Offers outstanding print quality. Extremely compatible. Easy to use. And versatile enough to grow with you as your business grows. All of this is yours, at an affordable price that won't hurt your bottom line.

Like most diamonds, the LaserPrinter 4 is as brilliant as a star. It provides positive proof that good things come in small packages. And it's more than ready to make your documents glow.

## Advanced technology results in faster performance

One of the reasons why the LaserPrinter 4 from Star clearly shines far above the rest is that it incorporates a RISC (Reduced-Instruction-Set-Computing) processor for enhanced performance. This high tech processor significantly reduces the time it takes for the printer to translate data from the computer. Which means that the Star LaserPrinter 4 is significantly faster than other four page per minute laser printers that do not utilize the latest in technology.

## Full compatibility means work begins the very first day

The Star LaserPrinter 4 offers full compatibility with the HP LaserJet IIP. Compatibility doesn't end with just full HP IIP software emulation, also supported are HP font cartridges, lower paper cassette and disposable EP-L cartridge — for operation that's virtually maintenance-free. For additional versatility, Epson FX-850 dot matrix printer emulation is also a standard feature. Plus, a variety of interfaces making it a snap to connect to almost every personal computer. In short, the Star LaserPrinter 4 can easily fit into your office environment from the very first day.

## Speed is just the beginning of the story

Star knows that there's more to business printing than just speed. That's why the LaserPrinter 4 also produces exceptional publication-quality documents at 300 dots per inch (dpi). It's 14 internal fonts are fully compatible with all popular personal computer software. And additional HP compatible font cartridges are easily installed. With double the memory of most comparatively priced laser printers, its full megabyte of memory makes downloading of soft fonts a standard procedure. You can easily combine fonts, sizes and weights with graphics, charts and illustrations to give your document that Star look.

## Easy operation and maintenance keep everyone happy

The Star LaserPrinter 4 fits into your office environment in another way: it's exceptionally easy to use and maintain, so it stays on friendly terms with everyone in your office. The control panel and 16-digit LCD display is logically designed to simplify operation while providing advanced functionality. Paper can be taken out, replenished and installed in moments. And its one-piece, disposable EP-L toner/drum cartridge design is clean and simple to install and remove. All of which contributes to less downtime and greater productivity.

## Let the paper flow

Star's LaserPrinter 4 offers uncompromising versatility... allowing you to handle an incredible variety of printing tasks. Its multi-purpose tray or optional lower paper cassette easily manages five sizes of plain paper, including letter, legal, executive, A4 and B5 as well as, four envelope sizes. You can also print out on transparency film, labels and post cards for added flexibility. When you need to let the paper flow, you need the Star LaserPrinter 4.

## Options let you build on a firm foundation

The Star LaserPrinter 4 is designed to grow as your needs grow. Memory is expandable up to five megabytes... enough for full-page graphics, a downloadable font library, and much more. A lower paper cassette is available for larger print jobs or if you require the flexibility of full dual-bin capability. An IBM Proprinter XL24 emulation cartridge is also available. And for more advanced desktop publishing capability, Starpage Postscript compatible board can also be added (available in the near future). With these options, you can be sure the Star LaserPrinter 4 always matches your needs.

### Internal fonts

Typeface	Style & Weight	Pitch	Point	Orientation	Sample
